

## ISTQB Advanced Technical Test Analyst + exam

**Duration: 3 Days    Course Code: ISTQBA-TTA    Delivery Method: Virtual Learning**

---

### Overview:

The three-day ISTQB Advanced Technical Test Analyst course prepares participants for the ISTQB Advanced Technical Test Analyst certificate. After the training the participant can design and execute structural (white box) tests, especially focused on non-functional quality attributes such as performance, security and maintainability. In addition the participant has insight into the important role of the technical test analyst in the field of test automation and static and dynamic analysis.

#### Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

---

### Target Audience:

This course is intended for professionals in software testing, such as testers, test analysts, test engineers, test consultants, test managers, acceptance testers and developers.  
The ISTQB Advanced Technical Test Analyst training course is also suitable for anyone who wants to gain in-depth knowledge about designing software tests, such as project managers, quality managers, development managers, business analysts, heads of IT and management consultants.

---
