

IBM Storage Defender Data Protect Setup and Configuration

Duration: 1 Day **Course Code: SSCH2G**

Overview:

IBM Storage Defender Data Protect is a comprehensive data backup and recovery solution that supports a wide range of cloud-native, edge, and on-premises workloads at scale.

It helps organizations meet governance and compliance requirements for data protection and incident response, significantly reducing operational and cyber risk.

In this one-day course, students learn how to deploy and perform initial maintenance tasks for an IBM Storage Defender Data Protect cluster. Hands-on lab exercises are conducted using a Linux-based environment.

Updated Sept 2026

Target Audience:

Anyone interested in learning how to deploy and manage IBM Storage Defender Data Protect.

Objectives:

- **After this course participants should be able to:**
- Add additional nodes to an existing Data Protect cluster
- Deploy an IBM Storage Defender Data Protect cluster
- Perform a basic upgrade of a Data Protect cluster
- Use local administrative interfaces for cluster management

Prerequisites:

- No specific requirement for this course.
- Basic knowledge about Storage is recommended.

Testing and Certification

- None

Follow-on-Courses:

- None recommended
