

## IBM Storage Defender Data Protect Setup and Configuration

**Duration: 1 Day    Course Code: SSCH2G    Delivery Method: Virtual Learning**

### Overview:

**IBM Storage Defender Data Protect is a comprehensive data backup and recovery solution that supports a wide range of cloud-native, edge, and on-premises workloads at scale.**

It helps organizations meet governance and compliance requirements for data protection and incident response, significantly reducing operational and cyber risk.

In this one-day course, students learn how to deploy and perform initial maintenance tasks for an IBM Storage Defender Data Protect cluster. Hands-on lab exercises are conducted using a Linux-based environment.

*Updated Sept 2026*

### Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

### Target Audience:

Anyone interested in learning how to deploy and manage IBM Storage Defender Data Protect.

### Objectives:

- **After this course participants should be able to:**
- Add additional nodes to an existing Data Protect cluster
- Deploy an IBM Storage Defender Data Protect cluster
- Perform a basic upgrade of a Data Protect cluster
- Use local administrative interfaces for cluster management

### Prerequisites:

- No specific requirement for this course.
- Basic knowledge about Storage is recommended.

### Testing and Certification

- None

### Follow-on-Courses:

- None recommended

### Content:
