

Advanced Junos Enterprise Switching

Duración: 0 Días Código del Curso: AJEX Versión: 17a Método de Impartición: e-Learning (Self-Study)

Temario:

This two-day course is designed to provide detailed coverage of virtual LAN (VLAN) operations, Multiple Spanning Tree Protocol (MSTP) and VLAN Spanning Tree Protocol (VSTP), authentication and access control for Layer 2 networks, IP telephony features, class of service (CoS) and monitoring and troubleshooting tools and features supported on the EX Series Ethernet Switches. Through demonstrations and hands-on labs, students will gain experience in configuring and monitoring the Junos operating system and in monitoring device and protocol operations. This course uses Juniper Networks EX 4300 Series Ethernet Switches for the hands-on component, but the lab environment does not preclude the course from being applicable to other Juniper hardware platforms running the Junos OS. Optional lab components are available allowing attendees to perform network management and troubleshooting tasks using Junos Space Network Director 3.0. This course is based on Junos OS Release 17.1R1.8.

Advanced Junos Enterprise Switching (AJEX) is an advanced-level course.

e-Learning

Los servicios de e-learning y recursos on-demand que ofrece Global Knowledge, están diseñadas para permitir el acceso a los recursos de aprendizaje en cualquier lugar y en cualquier momento que convenga al alumno. Nuestra solución incluye la posibilidad de acceder a los equipos cuando se necesita para practicar sus habilidades y la oportunidad de ver y escuchar a nuestros expertos en la materia, ya que destacan las áreas clave de la formación.

Dirigido a:

This course benefits individuals responsible for configuring and monitoring EX Series switches using Junos ELS.

Objetivos:

- After successfully completing this course, you should be able to:
 - Describe some common IP telephony deployment scenarios.
 - Restrict traffic flow within a VLAN.
 - Describe features that facilitate IP telephony deployments.
 - Manage dynamic VLAN registration.
 - Configure and monitor features used in IP telephony deployments.
 - Tunnel Layer 2 traffic through Ethernet networks.
 - Explain the purpose and basic operations of CoS.
 - Review the purpose and operations of a spanning tree.
 - Describe CoS features used in Layer 2 networks.
 - Implement multiple spanning-tree instances in a network.
 - Configure and monitor CoS in a Layer 2 network.
 - Implement one or more spanning-tree instances for a VLAN.
 - Describe a basic troubleshooting method.
 - List the benefits of implementing end-user authentication.
 - List common issues that disrupt network operations.
 - Explain the operations of various access control features.
 - Identify tools used in network troubleshooting.
 - Configure and monitor various access control features.
 - Use available tools to resolve network issues.
 - Describe processing considerations when multiple authentication and access control features are enabled.
 - Discover, configure, and troubleshoot EX Series switches using Junos Space Network Director.

Prerrequisitos:

- Students should have an intermediate-level of networking knowledge and an understanding of the Open Systems

Exámenes y certificación

- This course is recommended training for the the Juniper Networks Certified Professional Enterprise Routing and Switching

Interconnection (OSI) reference model and the TCP/IP protocol suite. Students should also attend the *Introduction to the Junos Operating System* (IJOS) course, and the *Junos Enterprise Switching* (JEX) course prior to attending this class.

- JEX - Junos Enterprise Switching

(JNCIP-ENT) certification

Siguientes cursos recomendados:

- The JNCIE-ENT Bootcamp is a suggested follow on course.
- AJER - Advanced Junos Enterprise Routing

Contenido:

Chapter 1: Course Introduction

Chapter 2: Advanced Ethernet Switching

- Virtual Local Area Networks
- Automating VLAN Administration
- Tunneling Layer 2 Traffic
- Lab 1: Advanced Ethernet Switching

Chapter 3: Advanced Spanning Tree

- Spanning Tree Review
- MSTP
- VSTP
- Advanced Spanning Tree Troubleshooting
- Lab 2: Advanced Spanning Tree

Chapter 4: Authentication and Access Control

- Authentication Overview
- Access Control Features
- Overview of Authentication Processing
- Lab 3: Authentication and Access Control

Chapter 5: Deploying IP Telephony Features

- Deployment Scenarios
- IP Telephony Features
- Case Study: Deploying IP Telephony Features
- Lab 4: Deploying IP Telephony Features

Chapter 6: Class of Service

- Class of Service Review
- Processing and Feature Overview
- Case Study: Implementing Class of Service
- Junos Space Network Director CoS Profiles
- Troubleshooting Class of Service
- Lab 5: Class of Service

Chapter 7: Monitoring and Troubleshooting Layer 2 Networks

- Introduction to Monitoring and Troubleshooting
- Monitoring and Troubleshooting Tools
- Case Studies
- Lab 6: Monitoring and Troubleshooting

Appendix A: ELS and Non-ELS Configuration Examples

- Switch Options
- IRB and VLAN Interfaces
- Q-in-Q Tagging
