
DevOps Institute: DevOps Foundation (DOFD)® - Including Exam

Duración: 2 Días **Código del Curso: DEVOPSF**

Temario:

This course is an introduction to DevOps. The course emphasizes communication, collaboration, integration, and automation to improve the workflow between developers and IT operations professionals. Improved workflows lead to more opportunities to design software and services in a more agile fashion which can only be good for customers.

This course (based on the DevOps Institute syllabus) is intended as a basis for discovering the most important DevOps concepts and to understand the principles and methods behind this. The course will leave you with the inspiration to be the advocate of change; The idea is that what you have learned about DevOps - and continue to learn – is shared with others so that you can guide them.

Dirigido a:

The course is aimed at: -
Those engaged in IT development, IT operations and IT service management.

Individuals wishing to have detailed understanding of the principles of DevOps

IT professionals working in an Agile environment or will do, and who need a detailed understanding of the interaction between Agile and DevOps
