## CompTIA Server+

**Duración: 5 Días**    **Código del Curso: G012**    **Version: SK0-005**

---

### Temario:

This 5-day CompTIA IT Server+ course is designed to give IT personnel all the necessary base skills to support network servers within the corporate network. The course gives hands-on experience with installation, configuration, diagnosis, and troubleshooting server hardware and NOS issues.

---

### Dirigido a:

The course is targeted for computer technicians with a practical technical background who wish to formalise their knowledge and pass the Server+ exam. Server Support Technician Server Administrator IT/Server Technician Storage Administrator

---

### Objetivos:

- Describe different types of servers, and identify hardware and software components used in servers.
  - Install servers into a network environment.
  - Configure servers for optimal performance.
  - Employ preventive maintenance measures to keep servers running at acceptable performance levels.
  - Upgrade server hardware and software.
  - Discuss environmental issues that pertain to server operation.
  - Troubleshoot problems with server hardware and software.
  - Identify and explain disaster-recovery concepts and techniques.
- 

### Prerequisitos:

Delegates are required to meet the following prerequisites:

- A+ Certification: Core Hardware
- A+ Certification: Operating Systems Network+ Certification

### Exámenes y certificación

Recommended as preparation for exam(s):

- This course is preparation for the CompTIA Server+ (SK0-005)
-

## Contenido:

### Introduction to Servers

- Investigating Different Types of Servers
- Identifying Server Hardware
- Identifying Network Operating Systems and Other Software

### Installing Servers

- Planning for Server Installation
- Adding Server Hardware
- Verifying the Installation
- Data-transmission Media

### Configuring Servers

- Checking and Upgrading BIOS and Firmware Levels
- Configuring RAID
- Installing Network Operating Systems and Other Software
- Configuring External Peripheral Devices
- Installing System Monitoring Agents and Service Tools
- Documenting the Server

### Maintaining Servers

- Backing Up Server Data
- Baselining Servers and Monitoring Server Performance
- Setting SNMP Thresholds
- Keeping the Server Clean
- Verifying Hardware
- Establishing Remote Notification

### Upgrading Server Components

- Creating and Using Upgrade Check Lists
- Adding and Replacing Hardware
- Upgrading Server Software

### Exploring Environmental Issues Surrounding Servers

- Evaluating the Physical Security of Servers
- Evaluating the Server Room Environment

### Troubleshooting Servers

- Reviewing General Troubleshooting Information
- Analyzing the Problem and its Cause
- Using Diagnostic Software
- Identifying Bottlenecks

### Exploring Disaster Recovery Concepts and Techniques

- Ensuring Redundancy and Availability
- Backups
- Creating a Disaster Recovery Plan

---
