

---

## Guerrilla Modern Web Development

Duración: 5 Días Código del Curso: GK0776

---

### Temario:

In this course, you will learn how to develop modern web applications using a combination of JavaScript, jQuery, AngularJS, Ajax, OWIN/Katana, ASP.NET Web API, HTML5, and CSS techniques. You will learn how to apply these various techniques to create modern client side web applications that use the power of the client via the rich document object model and the JavaScript runtime environment the browser provides.

---

### Dirigido a:

Experienced web developers

---

### Objetivos:

- Power of JavaScript and how it differs from languages like C# or Java
  - Discover jQuery for making it easy to work with the DOM
  - Learn the modern client-side framework AngularJS and see why it's so powerful
  - Use Ajax and ASP.NET Web API to transport data between the client and server
  - What is OWIN and Katana and how it can be used to build and secure applications
  - Benefit from new HTML5 features such as web storage, offline, web sockets and more
  - Use CSS and LESS to style your web applications using the Bootstrap framework
- 

### Prerequisitos:

- 
- 

### Contenido:

Automating Development Processes
