

Advanced AngularJS

Duración: 2 Días **Código del Curso: GK2360** **Método de Impartición: Curso Remoto (Virtual)**

Temario:

In this course, you will learn the best practices for building and testing AngularJS application through a thorough understanding of the AngularJS internals. You will discover how to use the rich components of Angular-UI to enhance your application and test drive it with Protractor.

Note: You are required to bring your own laptop.

Curso Remoto (Abierto)

Nuestra solución de formación remota o virtual, combina tecnologías de alta calidad y la experiencia de nuestros formadores, contenidos, ejercicios e interacción entre compañeros que estén atendiendo la formación, para garantizar una sesión formativa superior, independiente de la ubicación de los alumnos.

Dirigido a:

Experienced web developers with a minimal of six months AngularJS development who want to:
Learn more about the AngularJS ecosystem
Understand how development tooling like Gulp can make them more productive
Both unit test and end to end test their AngularJS application
Learn more about the internals of AngularJS
Optimize their productivity while building AngularJS applications

Objetivos:

- AngularJS application
- Root scopes, services, factories, providers, filters, and decorators
- AngularJS Patterns
- Building AngularJS applications with NPM and CommonJS
- AngularJS Internals
- End-to-end testing with Protractor
- Angular-UI

Prerequisites:

- Experience with AngularJS, JavaScript, and web technologies

Exámenes y certificación

-

Contenido:

- Root Scopes, Services, Factories, Providers, Filters, and decorators
- AngularJS Patterns
- Building AngularJS applications with NPM and CommonJS
- AngularJS Internals
- End-to-End Testing with Protractor
- Angular-UI
- Labs: n/a
