

## Risk Management

**Duración: 3 Días    Código del Curso: GK2811    Método de Impartición: Curso Cerrado (In-Company)**

### Temario:

#### **Avoid project catastrophe by developing expertise in risk management.**

This course is designed for project managers who want to proactively reduce the probability of project failure. In this course, you will learn to use proven approaches and techniques specific to risk management. You will learn to plan and analyze projects so as to minimize risk in a formal environment. You will identify, analyze, and address uncertainty throughout the project lifecycle and incorporate lessons learned and industry best practices related to risk management. You will apply PMI risk management processes in a practical way to eliminate, mitigate, and minimize threats while maximizing and optimizing opportunities.

Students pursuing a university-recognized and/or accredited certificate in Canada or continuing education units in the US must attend at least 90% of class time, participate in class exercises and section-knowledge checks, and score at least 70% on an end-of-class, multiple-choice assessment.

PMI is a registered mark of the Project Management Institute, Inc.

*Updated 30/6/2026*

### Dirigido a:

Associate project managers, project managers, IT project managers, project coordinators, project analysts, project leaders, senior project managers, team leaders, product managers, and program managers.

### Objetivos:

- Assess overall project riskiness
- Manage uncertainty in terms of both opportunities and threats
- Role of a risk management plan
- Risk within an execution strategy
- Conduct qualitative risk assessments in order to rank risks
- Conduct quantitative risk assessments in order to adequately budget for uncertainty
- Develop risk response plans for significant risks
