

Palo Alto Networks: Panorama Centralized Network Security Administration (PCNS-ADMIN)

Duración: 2 Días **Código del Curso: PAN-PCNS-ADMIN**

Temario:

The Palo Alto Networks Panorama: Centralized Network Security Administration course is two days of instructor-led training that should help you to:

- Learn how to configure and manage the next-generation Panorama management server
- Gain experience configuring templates (including template variables) and device groups
- Activate, configure, and manage Prisma Access using Panorama

Dirigido a:

- Security Administrators
- Security Operations Specialists
- Security Analysts

Objetivos:

- This course should help students gain experience configuring and managing Palo Alto Networks Panorama management servers. Administrators that complete this course should become familiar with the Panorama management server's role in managing and securing the overall network.

Prerequisitos:

Participants should complete the Firewall: Configuration and Management class (EDU-210).

Participants must be familiar with Palo Alto Networks next-generation firewall management and basic networking concepts, including routing and IP addressing.
