

System Operator for IBM i

Duración: 4 Días Código del Curso: AS24G Método de Impartición: Curso Remoto (Virtual)

Temario:

This course enables a new system operator to develop basic to intermediate level skills needed for day-to-day operations of IBM i. Specifically, the course explains how to:

- Use the online help and references
- Send, display, and reply to messages
- Monitor and control jobs, devices, and job and output queues
- Start and stop the system
- Create and change user profiles
- Use authorization lists and group profiles
- Manage system configuration
- Save and restore objects, libraries, and the system
- Monitor job and history logs
- Diagnose a system problem
- Order, receive, and apply PTFs
- Perform all of these functions using a 5250 emulation session as well as IBM i Access Client Solutions and IBM Navigator for i

Hands-on exercises reinforce the lecture topics and prepare the student to successfully operate an IBM Power environment that runs IBM i.
