
IBM Storage Protect version 8.1.12 Implementation and Administration

Duración: 5 Días Código del Curso: TS619G Método de Impartición: Curso Remoto (Virtual)

Temario:

IBM Spectrum Protect 8.1.12 is a data backup and recovery solution designed to help you manage your data retention, reduce the cost of storage, and provide appropriate recovery point objectives to meet any service level agreement. IBM Spectrum Protect offers improved efficiency and flexibility using object-based data management and policy driven retention.

This five-day course will focus on implementation and basic administration of an IBM Spectrum Protect environment. The hands-on lab exercises are performed on a Windows 2016 environment. The course materials include examples of AIX and Linux commands, when different from Windows.

Curso Remoto (Abierto)

Nuestra solución de formación remota o virtual, combina tecnologías de alta calidad y la experiencia de nuestros formadores, contenidos, ejercicios e interacción entre compañeros que estén atendiendo la formación, para garantizar una sesión formativa superior, independiente de la ubicación de los alumnos.

Dirigido a:

Implementers and administrators who are new to IBM Spectrum Protect data management

Objetivos:

- | | |
|--|---|
| ■ Describe the purpose of IBM SpectrumProtect | ■ Configure the IBM Spectrum Protect database and storage pools for protection |
| ■ Install and configure the IBM Spectrum Protect components | ■ Optimize client configuration |
| ■ Use the administrative and client interfaces | ■ Perform backup, restore, archive and retrieve operations |
| ■ Discuss storage methodology options and create storage pool | ■ Organize daily tasks required to protect the IBM Spectrum Protect environment |
| ■ Customize data movement and retention policies to meet business requirements | ■ Automate and monitor client and administrative tasks and events |
-

Prerequisitos:

- | | |
|---|--|
| ■ Ability to navigate Windows 2016 | |
| ■ A basic understanding of concepts regarding client/server relationships | |
-

Contenido:

Unit 1: Concepts and components	Unit 5: Policy management, data movement, and expiration	Unit 9: Daily operations and maintenance
Unit 2: Installation and configuration	Unit 6: Server database and storage pool management	Unit 10: Schedules and reports
Unit 3: Interfaces and monitoring	Unit 7: Client configuration and management	
Unit 4: Storage pools and devices	Unit 8: Client data protection
