

Watson Discovery: Mastering Document Retrieval with Watson Discovery API

Duración: 1 Días **Código del Curso: W7L263G** **Método de Impartición: Curso Remoto (Virtual)**

Temario:

This course provides an in-depth exploration of the Watson Discovery API to build an enterprise search tool. You learn how to create regular expressions, upload dictionaries, customize queries, conduct relevancy training, and extract results.

Dirigido a:

Data Scientist, AI Specialists, Machine Learning Specialists

Objetivos:

- After this course participants should be able to:
- Develop a document retrieval tool using the API
- Define the capabilities and limitations of Watson Discovery API

Prerequisitos:

- Intermediate knowledge of Watson Discovery
- Intermediate Python programming language
- Familiarity with REST API

Contenido:

Business scenario	Document retrieval fundamentals with Watson Discovery API	Relevancy training
Introduction to Watson Discovery	Query parameters and operators	Export results

Información Adicional:

Official course book provided to participants
