

IBM Business Automation Workflow 23.0.2: Advanced Routing and Integrations and Error Handling

Duración: 1 Días Código del Curso: WB877G Método de Impartición: Curso Remoto (Virtual)

Temario:

In this advanced one-day course, you implement advanced routing and integrate your process application with external systems with IBM Business Automation Workflow (BAW).

You create a decision service, implement message events, apply asset tagging, and access and manipulate external data. You integrate your process application with a database and learn about exposed process variables (EPVs) and environment variables (ENVs). You develop a catch exception and implement error handling in a service. You add advanced routing capabilities to your process application by using team filter services and implement a "four eyes" policy.

Curso Remoto (Abierto)

Nuestra solución de formación remota o virtual, combina tecnologías de alta calidad y la experiencia de nuestros formadores, contenidos, ejercicios e interacción entre compañeros que estén atendiendo la formación, para garantizar una sesión formativa superior, independiente de la ubicación de los alumnos.

Dirigido a:

This course is designed for project members who design and implement detailed logic, data models, and external system integrations for an executable business process. These roles include process owners, BPM analysts, BPM authors, BPM developers, BPM administrators, and BPM project managers.

Objetivos:

- After this course participants should be able to:
- Create a decision service
- Create and configure a UCA
- Start a process with a message start event
- Query a database to obtain information and populate a list variable
- Create environment variables (ENVs) and exposed process variables (EPVs)
- Catch an error in a process or service
- Harden a service with a catch exception component
- Implement the "four eyes" policy by using a team filter

Prerequisitos:

Before taking this course, you should have:

- Practical knowledge of data structures
- Understanding of SQL syntax and JavaScript
- Basic understanding of web services
- Experience with modern programming techniques
