

IBM Business Automation Workflow 23.0.2: Creating and Managing Case Management Solutions

Duración: 1 Días Código del Curso: WB880G Método de Impartición: Curso Remoto (Virtual)

Temario:

In this two-day intermediate-level course, you learn about case solution design using IBM Business Automation Workflow (BAW). You export and import case solutions. You define various case objects such as properties, choice lists, roles, business objects, and case types. You create To-do Tasks and Container activities and implement preconditions and Sets to manage activities. You create custom property views for case pages. You model BPM processes for case activities and create client-side human services. You create case stages and manage the stages manually and automatically with JavaScript. This course also teaches you how to create custom pages and implement Free Form page layout and utility widgets for case solutions.

Curso Remoto (Abierto)

Nuestra solución de formación remota o virtual, combina tecnologías de alta calidad y la experiencia de nuestros formadores, contenidos, ejercicios e interacción entre compañeros que estén atendiendo la formación, para garantizar una sesión formativa superior, independiente de la ubicación de los alumnos.
