VMware Horizon 8: Virtual Desktop Bootcamp

Duración: 5 Días   Código del Curso: VMHVDB

Temario:

VMware Horizon® 8: Virtual Desktop Bootcamp is a five-day combination course of VMware Horizon 8: Skills for Virtual Desktop Management and VMware Horizon 8: Virtual Desktop Troubleshooting. This training combination gives you the skills to deliver virtual desktops and applications through a single virtual desktop infrastructure platform.
You build skills in configuring and managing VMware Horizon 8 through a combination of lecture and hands-on labs. You learn how to configure and deploy pools of virtual machines and how to provide a customized desktop environment to end-users. Additionally, you learn how to resolve common issues that occur in a VMware Horizon environment.
You engage in a series of lab exercises to bring existing environment issues to resolution. The exercises mirror real-world troubleshooting use cases. These exercises equip learners with the knowledge and practical skills to manage typical challenges faced by virtual desktop administrators and operators.
Product Alignment: VMware Horizon 8 v2006

Dirigido a:

Operators, administrators, and architects responsible for the creation, maintenance, or delivery of remote and virtual desktop services.

Objetivos:

- By the end of the course, you should be able to meet the following objectives:

- Recognize the features and benefits of Horizon

- Use VMware vSphere® to create VMs to be used as desktops for Horizon

- Create and optimize Windows VMs to create Horizon desktops

- Install and configure Horizon Agent on Horizon desktop

- Configure and manage the VMware Horizon® Client™ systems and connect the client to a VMware Horizon desktop

- Configure, manage, and entitle desktop pools of full VMs

- Configure, manage, and entitle pools of instant-clone desktops

- Create and use Remote Desktop Services (RDS) desktops and application pools

- Monitor the Horizon environment using Horizon Console Dashboard and Horizon Help Desk Tool

- Implement a structured approach to troubleshooting

- Resolve common issues that occur in a Horizon environment

- Troubleshoot issues with linked and instant clones

- Configure the Windows client

- Identify the correct log level for gathering logs

- Optimize protocols for the best end-user experience

Prerequisitos:

Customers attending this course should have, at a minimum, the following VMware infrastructure skills:

- Use VMware vSphere® Web Client to view the state of virtual machines, datastores, and networks
- Open a virtual machine console on VMware vCenter Server® and access the guest operating system

Attendees should also have the following Microsoft Windows system administration experience:

- Configure Active Directory services, including DNS, DHCP, and time synchronization
- Restrict user activities by implementing Group Policy objects

Exámenes y certificación

VMware Horizon 8: Skills for Virtual Desktop Management is the first half of a two-course requirement for the following certification:

- VMware Certified Professional – Desktop and Mobility 2020 (VCP-DTM 20202)

VMware Horizon 8: Virtual Desktop Troubleshooting does not satisfy a course requirement for the VCP-DTM exam.

■ Configure Windows systems to enable Remote Desktop
  Connections
■ Build an ODBC connection to an SQL Server database

Contenido:

- Structured approach to troubleshooting configuration and operational problems
- Applying troubleshooting methods
- Documenting the steps to resolve the problem
