

Administering Cisco Unified Communications Workspace Part 1

Durée: 5 Jours Réf de cours: ACUCW1 Version: 12.5 Méthodes d'apprentissage:
Intra-entreprise & sur-mesure

Résumé:

This exclusive course offers a unique real-world environment focusing on the administration of a Cisco IP telephony, video and voice mail solution, including: Cisco Unified Communications Manager (CUCM) v12.5: Unity Connection v12.5: Cisco IM&P v12.5.

You will learn how to access the CUCM administrative pages to perform moves, adds, and changes of Cisco IP phones, while configuring users and associating them with phones. You will learn to configure simple features, such as DND, Music on Hold, MeetMe conferencing, and shared lines and barge, as well as access to CUCM user web pages. Configuring voice mail accounts for users, building a Jabber Client, and managing licenses using Prime License Manager with Cisco Unified Communications Manager v12.5 are also incorporated in this course. You will gain a basic understanding of the route patterns that are used for dialing and Class of Service, controlling who can dial where, such as internal, local, long distance, and so forth.

The lab environment features a fully configured cluster with Headquarters and PSTN sites. A complete dial plan, including Class of Service, is deployed using the most recent CUCM features supporting simpler dial plan configuration. Our Unified Communications (UC) courses provide a simulated PSTN, enabling you to gain an understanding of the North American Numbering Plan (NANP) and the concepts associated with a variable-length on-net dial plan supporting multiple sites with overlapping extensions. In this class, the dial plan is preconfigured and allows you to apply Class of Service to phones and lines and to test calling to 3-digit, 7-digit, 10-digit, 11-digit, and international route patterns.

Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

Public visé:

Administrators who need to perform MACDs (Moves, Adds, Changes and Deletes). Administrators, engineers, network architects, and integrators with overall responsibility for Cisco UC networks requiring a better understanding of multisite administration.

Objectifs pédagogiques:

- During this course you will learn:
- Understand basic CUCM architecture and terminology
- How the CUCM administrative and user GUIs work
- Get organized with Device Pools and other common elements of phone configuration
- Understand Internal dialing in a multi-site/multi-cluster deployment
- Manage Directory Numbers and DIDs in a multi-site/multi-cluster deployment, track assigned/unassigned and temporarily reserved DIDs and quickly find available DIDs at any site when adding new Users
- Work with shared lines and phantom numbers
- Add and delete phones manually, using auto registration and using the BAT tool
- Speed up Moves/Adds and Changes at each site with LDAP and templates
- Build and use site specific templates
- Make the most out of the BAT tool to make moves, adds, changes and deletes quicker and easier to manage
- Manage Meet me number ranges and Conference Now conferencing in a multi-site environment
- Add users, assign them capabilities, and associate them with phones
- Configure phones for Class of Service using the line/device approach
- Configure phones for voice mail
- Configure Cisco Unity Connection users
- Deploy and use the Cisco Jabber Client in Phone Only and Full UC modes

Pré-requis:

Attendees should meet the following prerequisites:

- Familiarity with relevant technologies and an understanding of router configuration is recommended but not required.

Test et certification

Recommended as preparation for the following exams:

- There is no exam currently aligned to this course

Après cette formation, nous vous conseillons le(s) module(s) suivant(s):

- ACUCW2 - Administering Cisco Unified Communications Workspace Part 2
-

- Lab 9-Implementing Endpoints using BAT
- Lab 10-IMP and Jabber Clients
- Lab 11-Basic Cisco IP Phone Configuration: Basic Features
- Lab 12-MACDs - Managing the NYC516 Site OPTIONAL BONUS Lab
- Lab 13-Exploring Call Flows in CUCM

Autres moyens pédagogiques et de suivi:

- Compétence du formateur : Les experts qui animent la formation sont des spécialistes des matières abordées et ont au minimum cinq ans d'expérience d'animation. Nos équipes ont validé à la fois leurs connaissances techniques (certifications le cas échéant) ainsi que leur compétence pédagogique.
- Suivi d'exécution : Une feuille d'émarginement par demi-journée de présence est signée par tous les participants et le formateur.
- En fin de formation, le participant est invité à s'auto-évaluer sur l'atteinte des objectifs énoncés, et à répondre à un questionnaire de satisfaction qui sera ensuite étudié par nos équipes pédagogiques en vue de maintenir et d'améliorer la qualité de nos prestations.

Délais d'inscription :

- Vous pouvez vous inscrire sur l'une de nos sessions planifiées en inter-entreprises jusqu'à 5 jours ouvrés avant le début de la formation sous réserve de disponibilité de places et de labs le cas échéant.
- Votre place sera confirmée à la réception d'un devis ou "booking form" signé. Vous recevrez ensuite la convocation et les modalités d'accès en présentiel ou distanciel.
- Attention, si cette formation est éligible au Compte Personnel de Formation, vous devrez respecter un délai minimum et non négociable fixé à 11 jours ouvrés avant le début de la session pour vous inscrire via moncompteformation.gouv.fr.

Accueil des bénéficiaires :

- En cas de handicap : plus d'info sur globalknowledge.fr/handicap
- Le Règlement intérieur est disponible sur globalknowledge.fr/reglement
