

Conducting Threat Hunting and Defending using Cisco Technologies for CyberOps

Durée: 5 Jours **Réf de cours: CBRTHD** **Version: 1.1** **Méthodes d'apprentissage: Intra-entreprise & sur-mesure**

Résumé:

The Conducting Threat Hunting and Defending using Cisco Technologies for Cybersecurity (CBRTHD) course introduces and guides you to a proactive security search through networks, endpoints, and datasets to hunt for malicious, suspicious, and risky activities that may have evaded detection by existing tools.

The Conducting Threat Hunting and Defending using Cisco Technologies for Cybersecurity (CBRTHD) course introduces and guides you to a proactive security search through networks, endpoints, and datasets to hunt for malicious, suspicious, and risky activities that may have evaded detection by existing tools. In this training, you will learn the core concepts, methods, and processes used in threat hunting investigations. Threat hunting involves going beyond what Security Operations Center (SOC) analysts already know or have been alerted to. Traditional cyber detection technologies will only identify malicious risks and behaviors. The art of threat hunting is about venturing into the unknown. In this training, you will learn the core concepts, methods, and processes used in threat hunting investigations. This training provides an environment for attack simulation and threat hunting skill development using a wide array of security products and platforms from Cisco and third-party vendors. You will perform genuine threat hunting exercises within simulated network environments.

This training prepares you for the 300-220 CBRTHD v1.0 exam. If passed, you earn the Cisco Certified Specialist – Threat Hunting and Defending certification and satisfy the concentration exam requirement for the Cisco Certified Network Professional (CCNP) Cybersecurity certification.

This training also earns you 40 Continuing Education (CE) credits toward recertification.

Formation intra-entreprise

Cette formation est délivrable en session intra-entreprise, dans vos locaux ou dans les nôtres. Son contenu peut être adapté sur-mesure pour répondre aux besoins de vos collaborateurs. Contactez votre conseiller formation Global Knowledge ou adressez votre demande à info@globalknowledge.fr.

Public visé:

- Security Operations Center staff
- SOC Tier 2 Analysts
- Threat Hunters
- Cyber Threat Analysts
- Threat Managers
- Risk Managements

Objectifs pédagogiques:

- | | |
|--|---|
| ■ By the end of this course, you should be able to: | ■ Identify and review endpoint-based threat hunting |
| ■ Define threat hunting and identify core concepts used to conduct threat hunting investigations | ■ Identify and review endpoint memory-based threats and develop endpoint-based threat detection |
| ■ Examine threat hunting investigation concepts, frameworks, and threat models | ■ Define threat hunting methods, processes, and Cisco tools that can be utilized for threat hunting |
| ■ Define cyber threat hunting process fundamentals | ■ Describe the process of threat hunting from a practical perspective |
| ■ Define threat hunting methodologies and procedures | ■ Describe the process of threat hunt reporting |
| ■ Describe network-based threat hunting | |

Pré-requis:

There are no prerequisites for this training. However, the

Test et certification

- This training prepares you for the 300-220 CBRTHD v1.0 exam. If

knowledge and skills you are recommended to have before attending this training are: General knowledge of networks and network security

- CCNA - Mettre en oeuvre et administrer des solutions réseaux Cisco
- CBROPS - Understanding Cisco Cybersecurity Operations Fundamentals
- CBRCOR - Performing CyberOps Using Cisco Security Technologies

passed, you earn the Cisco Certified Specialist – Threat Hunting and Defending certification and satisfy the concentration exam requirement for the Cisco Certified Network Professional (CCNP) Cybersecurity certification.

Contenu:

Outline

- Threat Hunting Theory
- Threat Hunting Concepts, Frameworks, and Threat Models
- Threat Hunting Process Fundamentals
- Threat Hunting Methodologies and Procedures
- Network-Based Threat Hunting
- Endpoint-Based Threat Hunting
- Endpoint-Based Threat Detection Development
- Threat Hunting with Cisco Tools
- Threat Hunting Investigation Summary: A Practical Approach
- Aftermath of a Threat Hunt

Lab Outline

- Categorize Threats with MITRE ATTACK Tactics and Techniques
- Compare Techniques Used by Different APTs with MITRE ATTACK Navigator
- Model Threats Using MITRE ATTACK and D3FEND
- Prioritize Threat Hunting Using the MITRE ATTACK Framework and Cyber Kill Chain
- Determine the Priority Level of Attacks Using MITRE CAPEC
- Explore the TaHiTI Methodology
- Perform Threat Analysis Searches Using OSINT
- Attribute Threats to Adversary Groups and Software with MITRE ATTACK
- Emulate Adversaries with MITRE Caldera
- Find Evidence of Compromise Using Native Windows Tools
- Hunt for Suspicious Activities Using Open-Source Tools and SIEM
- Capturing of Network Traffic
- Extraction of IOC from Network Packets
- Usage of ELK Stack for Hunting Large Volumes of Network Data
- Analyzing Windows Event Logs and Mapping Them with MITRE Matrix
- Endpoint Data Acquisition
- Inspect Endpoints with PowerShell
- Perform Memory Forensics with Velociraptor
- Detect Malicious Processes on Endpoints
- Identify Suspicious Files Using Threat Analysis
- Conduct Threat Hunting Using Cisco Secure Firewall, Cisco Secure Network Analytics, and Splunk
- Conduct Threat Hunt Using Cisco XDR Control Center and Investigate
- Initiate, Conduct, and Conclude a Threat Hunt

Autres moyens pédagogiques et de suivi:

- Compétence du formateur : Les experts qui animent la formation sont des spécialistes des matières abordées et ont au minimum cinq ans d'expérience d'animation. Nos équipes ont validé à la fois leurs connaissances techniques (certifications le cas échéant) ainsi que leur compétence pédagogique.
- Suivi d'exécution : Une feuille d'émargement par demi-journée de présence est signée par tous les participants et le formateur.
- En fin de formation, le participant est invité à s'auto-évaluer sur l'atteinte des objectifs énoncés, et à répondre à un questionnaire de satisfaction qui sera ensuite étudié par nos équipes pédagogiques en vue de maintenir et d'améliorer la qualité de nos prestations.
