
Certified Information Privacy Technologist + examen

Durée: 2 Jours **Réf de cours: CIPT-IAPP** **Méthodes d'apprentissage: Intra-entreprise & sur-mesure**

Résumé:

In this course you will gain foundational knowledge on both broad and global concepts of privacy and data protection laws and practice. You will learn common principles and approaches to privacy as well as understand the major privacy models employed around the globe. An introduction to information security concepts and information security management and governance will be covered including frameworks, controls, and identity and access management. You will also learn about online privacy as it relates to using personal information on websites and other internet-related technologies.

You will learn the need and importance for privacy in the IT environment with impacts such as regulatory activities, security threats, advances in technology and the proliferation of social networks. This course will provide an introduction to privacy laws, regulations, and standards impacting privacy in IT and the risks inherent in the IT environment. You will also learn about the importance of personally identifiable information and methods for ensuring its protection.

The CIPT designation is accredited under the internationally recognized ANSI/ISO standard 17024:2012, an acknowledgement of the quality and integrity of the programme.

This two-day program covering practices the principles of information privacy in technology includes:

Official IAPP CIPT Participant Guide Official IAPP CIPT Textbook Official IAPP CIPT Practice Test IAPP CIPT Certification Exam Voucher One-Year IAPP Membership

Your contact information must be provided to the IAPP for membership services fulfilment

Formation intra-entreprise

Cette formation est délivrable en session intra-entreprise, dans vos locaux ou dans les nôtres. Son contenu peut être adapté sur-mesure pour répondre aux besoins de vos collaborateurs. Contactez votre conseiller formation Global Knowledge ou adressez votre demande à info@globalknowledge.fr.

Public visé:

Individuals who need an understanding of the principles of information privacy in technology and those interested in pursuing CIPT certification.

Objectifs pédagogiques:

- Common Principles and Approaches to Privacy
 - Jurisdictions and Industries
 - Safeguarding Personal Information
 - Online Privacy
 - Privacy in the IT Environment
 - Core Privacy Concepts
 - Regulations and Standards Impacting Privacy in IT
 - Privacy in Systems and Applications
 - Online Privacy Issues
 - De-identifying and Anonymizing Personally Identifiable Information
 - Cloud Computing
-

Contenu:

Day 1	This unit discusses the web as a platform, as well as privacy considerations for sensitive online information, including policies and notices, access, security, authentication identification and data collection. Additional topics include children's online privacy, email, searches, online marketing and advertising, social media, online assurance, cloud computing and mobile devices.	This unit develops an understanding of the risks inherent in the IT environment and how to address them.
Module 1: Fundamentals of Information Privacy		
Unit 1: Common Principles and Approaches to Privacy		Unit 5: Online Privacy Issues
This unit includes a brief description of privacy, an introduction to types of information, an overview of information risk management and a summary of modern privacy principles.	Day Two	This unit presents information about online threats, threat prevention and the role of IT professionals to ensure proper handling of user data.
	■ Module 2: Privacy in Technology	
Unit 2: Jurisdiction and Industries	Unit 1: Understanding the Need for Privacy in the IT Environment	Unit 6: De-identifying and Anonymising Personally Identifiable Information
This unit introduces the major privacy models employed around the globe and provides an overview of privacy and data protection regulation by jurisdictions and by industry sectors.	This unit describes the impact which regulatory activities, security threats, advances in technology and the increasing proliferation of social networks have on IT departments.	This unit describes the importance of personally identifiable information and methods for ensuring its protection.
Unit 3: Information Security: Safeguarding Personal Information	Unit 2: Core Privacy Concepts	Unit 7: Cloud Computing
This unit presents introductions to information security, including definitions, elements, standards, and threats/vulnerabilities, as well as introductions to information security management and governance, including frameworks, controls, cryptography, and identity and access management (IAM).	This unit discusses how developing information lifecycle plans, data identification and classification systems, and data flow diagrams will make privacy compliance more attainable.	This unit discusses privacy and security concerns associated with cloud services, and standards that exist to advise on their use.
Unit 4: Online Privacy: Using Personal Information on Websites and with Other Internet-related Technologies	Unit 3: Regulations and Standards Impacting Privacy in IT	
	This unit introduces privacy laws, regulations and standards that can help IT professionals design better privacy programmes and systems to handle personal information throughout the data lifecycle.	
	Unit 4: Privacy in Systems and Applications	

Autres moyens pédagogiques et de suivi:

- Compétence du formateur : Les experts qui animent la formation sont des spécialistes des matières abordées et ont au minimum cinq ans d'expérience d'animation. Nos équipes ont validé à la fois leurs connaissances techniques (certifications le cas échéant) ainsi que leur compétence pédagogique.
- Suivi d'exécution : Une feuille d'emargement par demi-journée de présence est signée par tous les participants et le formateur.
- En fin de formation, le participant est invité à s'auto-évaluer sur l'atteinte des objectifs énoncés, et à répondre à un questionnaire de satisfaction qui sera ensuite étudié par nos équipes pédagogiques en vue de maintenir et d'améliorer la qualité de nos prestations.

Délais d'inscription :

- Vous pouvez vous inscrire sur l'une de nos sessions planifiées en inter-entreprises jusqu'à 5 jours ouvrés avant le début de la formation sous réserve de disponibilité de places et de labs le cas échéant.
- Votre place sera confirmée à la réception d'un devis ou ""booking form"" signé. Vous recevrez ensuite la convocation et les modalités
