

Data Literacy

Durée: 2 Jours Réf de cours: DATALIT

Résumé:

Get to know the power and pitfalls of data.

Clear insight into a data-driven world.

We are overloaded with data every day. One of the main challenges organisations face nowadays is a lack of data literacy. Do your employees have enough knowledge to read data properly, interpret it and turn it into valuable insights? This is crucial to be able to make the right decisions. Only then will your organisation be able to respond to the needs of your customers and opportunities in the market.

Are you curious enough?

Data literacy is the most important competence for people who work with data. It enables you to constantly look for new or existing data, question it and ask critical questions. It is therefore the skill that allows us to draw the right conclusions in today's data-driven reality. This will not only lead to faster decisions, but also to better results for your organisation.

From manipulation to information

In this training you will learn, on the basis of practical examples and exercises, not only about the power of data, but also about its pitfalls. You will get an answer to the question of how to read and interpret information correctly and which steps you should take to thoroughly analyse data. After completing this training Data Literacy, you will have several tools at your disposal to distinguish information from manipulation, based on your curiosity.

Public visé:

This training is designed for anyone who wants to understand and analyse data more quickly and communicate effectively.

Objectifs pédagogiques:

■ **In this training you will learn:**

- How to get more value out of your data;
- interpret data correctly;
- recognise the pitfalls of data;

- Improve and maintain the quality of your data;
 - the most important steps to take in order to analyse data in depth;
 - convince others with data-based arguments.
-

Contenu:

Block 1: Reading data

- Reading data presented to us in the media, company reports, political claims and advertisements
- How to distinguish information from manipulation
- Preventing misinterpretation

Practical assignment: applying the data checklist to a number of practical situations to promote our Data Literacy.

Block 2: Working with data

- Improving the quality of your data
- How do you ensure that you retain this quality?
- Discussing the most important data processing steps.
- Identifying the consequences of data processing

Practical assignment: estimating the consequences of the different processing steps on the results on the basis of a number of cases.

Block 3: Analysing data

- What are the most important steps to analyse data thoroughly?
- How do you prevent deception?
- What can we learn from the "scientific method" when it comes to data analysis?

Practical assignment: performing the most important analytical steps on a practical example.

Block 4: Arguing with and communicating data

- Being right is one thing, but being right is quite another.
- Transition and difference from analysis to explanation of data
- How do you convince others with data-based arguments?
- What can we learn from storytelling to better communicate our data?
- The 7 essential principles of good data storytelling

Practical assignment: Applying the 7 principles to a real-life example

Autres moyens pédagogiques et de suivi:

- Compétence du formateur : Les experts qui animent la formation sont des spécialistes des matières abordées et ont au minimum cinq ans d'expérience d'animation. Nos équipes ont validé à la fois leurs connaissances techniques (certifications le cas échéant) ainsi que leur compétence pédagogique.
- Suivi d'exécution : Une feuille d'émargement par demi-journée de présence est signée par tous les participants et le formateur.
- Modalités d'évaluation : le participant est invité à s'auto-évaluer par rapport aux objectifs énoncés.
- Chaque participant, à l'issue de la formation, répond à un questionnaire de satisfaction qui est ensuite étudié par nos équipes pédagogiques en vue de maintenir et d'améliorer la qualité de nos prestations.

Délais d'inscription :

- Vous pouvez vous inscrire sur l'une de nos sessions planifiées en inter-entreprises jusqu'à 5 jours ouvrés avant le début de la formation sous réserve de disponibilité de places et de labs le cas échéant.
- Votre place sera confirmée à la réception d'un devis ou "booking form" signé. Vous recevrez ensuite la convocation et les modalités d'accès en présentiel ou distanciel.
- Attention, si vous utilisez votre Compte Personnel de Formation pour financer votre inscription, vous devrez respecter un délai minimum et non négociable fixé à 11 jours ouvrés.
