

## Red Hat Certified Engineer (RHCE) exam for Red Hat Enterprise Linux 8

**Durée: 0.5 Jours**    **Réf de cours: EX294**    **Méthodes d'apprentissage: Virtual Learning**

### Résumé:

The performance-based Red Hat Certified Engineer (RHCE) exam for Red Hat Enterprise Linux 8 (EX294) tests your knowledge and skill in managing multiple systems using Red Hat® Ansible® Engine and executing common system administration tasks across a number of systems with Ansible. The skills tested in this exam are the foundation for system administration across many Red Hat products.

**By passing this exam, you become an RHCE®, which also counts toward becoming a Red Hat Certified Architect (RHCA®).**

This exam is based on Red Hat Enterprise Linux® 8 and Red Hat Ansible Engine 2.7.

### Public visé:

Experienced Red Hat Enterprise Linux system administrators seeking validation of their skills or require a certification either by their organization or based on a mandate (DoD 8570 directive) Students who have taken Red Hat System Administration III: Linux Automation (RH294) and are on the path to becoming a Red Hat Certified Engineer (RHCE) Students who are on the path to becoming a Red Hat Certified Architect (RHCA)

Systems administrators who want to demonstrate competency in managing multiple systems IT professionals who work in a DevOps environment and want to demonstrate competency in automating part of their workload Red Hat Certified Engineers who are noncurrent or who are about to become noncurrent and wish to recertify as RHCEs

### Objectifs pédagogiques:

- As an RHCE exam candidate, you should be able to handle all responsibilities expected of a Red Hat Certified System Administrator, including these tasks:
  - Create simple shell scripts that run ad hoc Ansible commands
- - Be able to perform all tasks expected of a Red Hat Certified System Administrator
  - - Create and use static inventories to define groups of hosts
- Understand and use essential tools
  - - Create Ansible plays and playbooks
- Operate running systems
  - Know how to work with commonly used Ansible modules
- Configure local storage
  - Use variables to retrieve the results of running a command
- Create and configure file systems
  - Use conditionals to control play execution
- Deploy, configure, and maintain systems
  - Configure error handling
- Manage users and groups
  - Create playbooks to configure systems to a specified state
- Manage security
  - - Use Ansible modules for system administration tasks that work with:
    - Software packages and repositories
- - Understand core components of Ansible
  - Services
- Inventories
  - Firewall rules
- Modules
  -
- Variables
  - Storage devices
- Facts
  - File content
- Plays
  - Archiving
- Playbooks
  - Scheduled tasks

- Configuration files
  - - Install and configure an Ansible control node
  - Install required packages
  - Create a static host inventory file
  - Create a configuration file
  - - Configure Ansible managed nodes
  - Create and distribute SSH keys to managed nodes
  - Configure privilege escalation on managed nodes
  - Validate a working configuration using ad hoc Ansible commands
  - - Script administration tasks
  - Create simple shell scripts
- Security
  - Users and groups
  - - Create and use templates to create customized configuration files
  - - Work with Ansible variables and facts
  - - Create and work with roles
  - - Download roles from an Ansible Galaxy and use them
  - - Manage parallelism
  - - Use Ansible Vault in playbooks to protect sensitive data
  - - Use provided documentation to look up specific information about Ansible modules and commands
- As with all Red Hat performance-based exams, configurations must persist after reboot without intervention.

---

### Pré-requis:

- Have either taken both Red Hat System Administration I (RH124) and Red Hat System Administration II (RH134) or RHCSA Rapid Track Course (RH199), or have comparable work experience as a system administrator on Red Hat Enterprise Linux
- Have taken Red Hat System Administration III: Linux Automation (RH294) or have comparable work experience
- Review the Red Hat Certified System Administrator (RHCSA) exam (EX200) objectives
- Review the Red Hat Certified Engineer (RHCE) exam for Red Hat Enterprise Linux 8 (EX294) objectives

---

### Contenu:

Red Hat encourages you to consider taking Red Hat System Administration I (RH124), Red Hat System Administration II (RH134), and Red Hat System Administration III: Linux Automation (RH294) to help prepare. Attendance in these classes is not required; students can choose to take just the exam.

While attending Red Hat classes can be an important part of your preparation, attending class does not guarantee success on the exam. Previous experience, practice, and native aptitude are also important determinants of success.

Many books and other resources on system administration for Red Hat products are available. Red Hat does not endorse any of these materials as preparation guides for exams. Nevertheless, you may find additional reading helpful to deepen your understanding.

## Méthodes pédagogiques :

### Exam format

This hands-on, practical exam requires you to use Red Hat Ansible Engine to perform real-world tasks. You will be provided with multiple systems and will be required to install and configure Ansible Engine and then use it to perform standard system administration tasks similar to what you would do on the job.

You will be required to create Ansible Playbooks and use those playbooks to configure systems for specific roles and behaviors. Your work will be evaluated by applying the playbooks created during the exam against freshly installed systems and verifying that those systems and services work as specified.

During the exam, you will be provided a list of tasks to accomplish related to the exam objectives. In most cases, the tasks will be described in terms of a specific end state that you must achieve. Your exam will be evaluated on whether your systems meet the criteria specified.

Internet access is not provided during the exam, and you will not be permitted to bring any hard copy or electronic documentation into the exam. This prohibition includes notes, books, or any other materials. For most exams, the documentation that ships with the product is available during the exam.

### Scores and reporting

Official scores for exams come exclusively from Red Hat Certification Central. Red Hat does not authorize examiners or training partners to report results to candidates directly. Scores on the exam are usually reported within 3 U.S. business days.

Exam results are reported as total scores. Red Hat does not report performance on individual items, nor will it provide additional information upon request.

---

### Autres moyens pédagogiques et de suivi:

- Compétence du formateur : Les experts qui animent la formation sont des spécialistes des matières abordées et ont au minimum cinq ans d'expérience d'animation. Nos équipes ont validé à la fois leurs connaissances techniques (certifications le cas échéant) ainsi que leur compétence pédagogique.
- Suivi d'exécution : Une feuille d'embarquement par demi-journée de présence est signée par tous les participants et le formateur.
- Modalités d'évaluation : le participant est invité à s'auto-évaluer par rapport aux objectifs énoncés.
- Chaque participant, à l'issue de la formation, répond à un questionnaire de satisfaction qui est ensuite étudié par nos équipes pédagogiques en vue de maintenir et d'améliorer la qualité de nos prestations.

Délais d'inscription :

- Vous pouvez vous inscrire sur l'une de nos sessions planifiées en inter-entreprises jusqu'à 5 jours ouvrés avant le début de la formation sous réserve de disponibilité de places et de labs le cas échéant.
- Votre place sera confirmée à la réception d'un devis ou "booking form" signé. Vous recevrez ensuite la convocation et les modalités d'accès en présentiel ou distanciel.
- Attention, si vous utilisez votre Compte Personnel de Formation pour financer votre inscription, vous devrez respecter un délai minimum et non négociable fixé à 11 jours ouvrés.
