

Business Analysis: Requirements Development, Documentation and Management

Durée: 4 Jours Réf de cours: GK2964 Méthodes d'apprentissage: Intra-entreprise & sur-mesure

Résumé:

Develop effective requirements that meet business and stakeholder objectives.

In this course, you will further explore the business analysis lifecycle in both waterfall and agile projects, with a focus on planning, documentation, analysis, management, and communication activities.

You will:

- Engage in up-front enterprise analysis to ensure that scope and problem statements are clear
- Build on the planning skills covered in Business Analysis Essentials to create a comprehensive business analysis plan
- Analyze the impact and influence of stakeholders to enable more effective elicitation of requirements
- Learn about how and when to use modeling techniques used in business analysis, and practice creating swimlane diagrams, use case models and descriptions, user stories, state diagrams, data dictionaries, and entity relationship diagrams
- Write effective requirements and accurately revise existing requirements to meet quality criteria
- Effectively manage the requirements to ensure accuracy, efficiency, and consistency in communication; to ensure requirements traceability, and to manage change
- Plan a review process to ensure the validity of requirements

This course is aligned with IIBA's *A Guide to the Business Analysis Body of Knowledge (BABOK®Guide)* standards.
