

Red Hat Identity Management and Authentication with Exam (EX362)

Durée: 5 Jours **Réf de cours: RH363** **Méthodes d'apprentissage: Virtual Learning**

Résumé:

Provide help to secure, centralized identity management services to coordinate user authentication and authorization with client systems, network services, and Windows domains.

Course Description

Red Hat Security: Identity Management and Authentication (RH362) provides the skills to configure and manage Identity Management (IdM), the comprehensive identity management component bundled with Red Hat Enterprise Linux. This course helps students to gain the skills with this technology most requested by customers.

Some topics covered in this course are central management and provisioning of user accounts; design and installation of IdM server topologies; operation of the integrated DNS and TLS Certificate Authority services; management of two-factor authentication, smart card authentication, and operation as a single-sign on provider; integration and management of two-way trusts with Active Directory; and troubleshooting and disaster recovery planning. Registration of Linux clients to IdM and operation in enterprise environments that use both Linux and Microsoft Windows clients and servers is discussed.

Note: This course is five days. Durations may vary based on the delivery. For full course details, scheduling, and pricing, select your location then "get started" on the right hand menu.

Course Content Summary

- Design an Identity Management topology for scale and resiliency.
- Describe key technologies used by IdM, including SSSD, PAM, Kerberos, and PKI.
- Install Identity Management (IdM) servers, replicas, and clients using Ansible Playbooks.
- Manage IdM services, including integrated DNS and CA.
- Configure and manage Kerberos authentication and secure services.
- Configure and manage TLS certificates.
- Create and manage a trust relationship with Microsoft Active Directory.
- Configure to help secure user authentication, including two-factor authentication and single sign-on.
- Configure and manage Sudo, HBAC, and RBAC policies.
- Manage secrets, vaults, certificates, and keys.
- Troubleshoot identity management.
- Integrate Satellite 6 and Red Hat Ansible Automation Platform with IdM.
- Configure IdM backup and recovery.

Public visé:

Red Hat Certified System Engineers (RHCE) who wish to learn how to provision and configure centralized identity management solutions for Linux clients and how to integrate them with other network services and identity management systems.

- Identity Management specialists or engineers
- Access Management specialists or engineers

Objectifs pédagogiques:

Impact on the organization

- Businesses will be able to integrate and centralize lifecycle management and security policy implementation and enforcement, and extend that consolidated management to additional enterprise configuration management products from the Red Hat portfolio, including Red Hat Ansible Automation Platform and Red Hat Satellite Server.

Impact on the individual

- As a result of attending this course, you will gain an understanding of the architecture of an identity management realm and trusted relationships using both Identity Management in Red Hat Enterprise Linux and Microsoft Active Directory. You will be able to create, manage, and troubleshoot user management structures, security policies, local and remote secure access methods, and implementation technologies such as SSSD, Kerberos, PKI, and certificates.

Pré-requis:

Recommended training

Test et certification

Recommended next exam or course

Take our free assessment to gauge whether this offering is the best fit for your skills.

An RHCE certification or equivalent skill is a prerequisite to this course.

Red Hat Certified Specialist in Identity Management exam (EX362)

Contenu:

- Identity Management in Red Hat Enterprise Linux Introduce Identity Management in Red Hat Enterprise Linux (IdM) and its high-level architecture.
- Identity Management Core Technologies Review the core technologies of Identity Management (IdM) in Red Hat Enterprise Linux.
- Installing Identity Management in Red Hat Enterprise Linux Install Identity Management servers, replicas, and clients on Red Hat Enterprise Linux 9.
- Implementing an Identity Management Topology Implement continuous functionality and high availability of IdM services in single-site and geographically distributed topologies.
- Managing the CA and DNS Integrated Services Manage the Certificate Authority (CA) and the Domain Name System (DNS) services that are integrated with Identity Management.
- Managing Users and Controlling User Access Configure users for authorized access to services and resources.
- Configuring Alternative Authentication Services Configure and manage smart card authentication, secrets, and two-factor authentication.
- Integrating Identity Management with Active Directory Implement a cross-forest trust between Identity Management and Active Directory, and configure ID views to map POSIX attributes to Active Directory users.
- Integrating Identity Management with Red Hat Utilities Integrate an Identity Management deployment with Red Hat Satellite and Red Hat Ansible Automation Platform.
- Troubleshooting and Disaster Recovery Planning for IdM Troubleshooting and preparing for disaster recovery with Identity Management.
- Comprehensive Review Build a small, resilient Identity Management topology to include multiple replicas and clients, populated with multiple users, credentials, policies, and access rights.

Méthodes pédagogiques :

Technology considerations

There are no special requirements other than those needed for standard courses delivered in ILT/VT/ROLE/RHLS delivery modes.

Autres moyens pédagogiques et de suivi:

- Compétence du formateur : Les experts qui animent la formation sont des spécialistes des matières abordées et ont au minimum cinq ans d'expérience d'animation. Nos équipes ont validé à la fois leurs connaissances techniques (certifications le cas échéant) ainsi que leur compétence pédagogique.
- Suivi d'exécution : Une feuille d'émargement par demi-journée de présence est signée par tous les participants et le formateur.
- En fin de formation, le participant est invité à s'auto-évaluer sur l'atteinte des objectifs énoncés, et à répondre à un questionnaire de satisfaction qui sera ensuite étudié par nos équipes pédagogiques en vue de maintenir et d'améliorer la qualité de nos prestations.

Délais d'inscription :

- Vous pouvez vous inscrire sur l'une de nos sessions planifiées en inter-entreprises jusqu'à 5 jours ouvrés avant le début de la formation sous réserve de disponibilité de places et de labs le cas échéant.
- Votre place sera confirmée à la réception d'un devis ou ""booking form"" signé. Vous recevrez ensuite la convocation et les modalités d'accès en présentiel ou distanciel.
- Attention, si cette formation est éligible au Compte Personnel de Formation, vous devrez respecter un délai minimum et non négociable fixé à 11 jours ouvrés avant le début de la session pour vous inscrire via moncompteformation.gouv.fr.

Accueil des bénéficiaires :

- En cas de handicap : plus d'info sur globalknowledge.fr/handicap
- Le Règlement intérieur est disponible sur globalknowledge.fr/reglement
