

Preparation for Professional Scrum Product Owner™ I (PSPO I) – Including Exam

Durée: 2 Jours Réf de cours: SCRUM-PO

Résumé:

There are many myths and misconceptions about the role of the Product Owner. The accountabilities of the Product Owner, however, go well beyond managing the Product Backlog and writing User Stories. The Product Owner is pivotal to bridging business strategy and product execution in order to help the **organization** create valuable products.

In this two day class* students will develop and solidify their knowledge of the Scrum framework and the accountabilities of being a Product Owner through instruction and team-based exercises. Students learn techniques that they can use to help them overcome the challenges that are often encountered on a day-to-day basis. They will do this while learning better ways to **collaborate** and **engage** with the **users** and **customers**, **stakeholders**, **their team(s)** and **organization** to provide greater value in the product being delivered.

Public visé:

This course is appropriate for students in any industry where teams are working to solve complex problems. The Professional Scrum Product Owner course is for:

- Product Managers wanting to up-skill their agile proficiency
- Professionals interested in advancing their Product Ownership skills
- Product Owners with some experience in the role that are looking to improve their understanding or improve their use of Scrum and the Product Owner accountabilities
- Scrum Masters wishing to improve how they can coach Product Owners

While this course covers an introduction to the Scrum framework, it's primarily from the perspective of Product Ownership. Therefore, it's best if the students come to the course with an understanding of the fundamentals of Scrum, ideally as demonstrated by passing the Scrum Open.

Objectifs pédagogiques:

- When a student leaves the classroom they will have improved skills to impact their products and organizations by:
- Improving value created by staying focused on value and outcomes
- Increasing organizational learning validating sooner rather than later which will also reduce costs
- Achieving better business outcomes by aligning initiatives with business strategy through shared vision and aligning people toward clear goals
- Increasing business agility by being data informed and empirical
