

## VMware Site Recovery Manager: Install, Configure & Manage

**Durée: 2 Jours & sur-mesure**    **Réf de cours: VMSRM**    **Version: 8.6**    **Méthodes d'apprentissage: Intra-entreprise**

### Résumé:

This two-day, hands-on training course gives experienced VMware vSphere® administrators the knowledge to install, configure, and manage VMware Site Recovery Manager™ 8.6. This course also shows you how to write and test disaster recovery plans that use Site Recovery Manager.

Product Alignment

- VMware Site Recovery Manager [V8.6]

Formation intra-entreprise

Cette formation est délivrable en session intra-entreprise, dans vos locaux ou dans les nôtres. Son contenu peut être adapté sur-mesure pour répondre aux besoins de vos collaborateurs. Contactez votre conseiller formation Global Knowledge ou adressez votre demande à [info@globalknowledge.fr](mailto:info@globalknowledge.fr).

### Public visé:

vSphere administrators, architects, system engineers, and systems integrators who are responsible for the deployment or management of Site Recovery Manager

### Objectifs pédagogiques:

- By the end of the course, you should be able to meet the following objectives:
- Summarize the components of Site Recovery Manager architecture
- Deploy and configure the Site Recovery Manager appliance
- Describe the principal disaster recovery topologies that are used with Site Recovery Manager
- Configure inventory and resource mappings
- Describe the storage replication options that are used with Site Recovery Manager
- Configure Site Recovery Manager to leverage array-based replication
- Describe VMware vSphere® Replication™ functionality
- Describe the vSphere Replication architecture
- Deploy and configure vSphere Replication for use with Site Recovery Manager
- Build Site Recovery Manager array-based protection groups, protection groups based on vSphere Replication, and Virtual Volumes protection groups.
- Build, edit, execute, test, and remove a recovery plan
- Perform a planned migration

### Pré-requis:

Before taking this course, you should have completed one of the following course(s):

- VMware vSphere: Install, Configure, Manage
- VMware vSphere: Fast Track
- VMware vSphere: What's New
- VMware vSphere: Troubleshooting

Or equivalent knowledge and administration experience with VMware ESXi™ and VMware vCenter Server™.

- VMWN - VMware What's New vSphere (mise à jour des connaissances)
  - VSFT - VMware vSphere: Fast Track
  - VSICM - VMware vSphere : Installation, Configuration et Administration
  - VST - VMware vSphere : Troubleshooting
-

## Contenu:

### 1 Course Introduction

- Introductions and course logistics
- Course objectives

### 2 Site Recovery Manager Architecture

- Describe Site Recovery Manager architecture
- Identify disaster recovery options with Site Recovery Manager
- Evaluate how Site Recovery Manager integrates with VMware products
- Describe Site Recovery Manager licensing options
- List the disaster recovery topologies supported by Site Recovery Manager
- Describe how VMware Site Recovery for VMware Cloud on AWS integrates with Site Recovery Manager

### 3 Deploying and Configuring Site Recovery Manager

- Identify the vSphere and vCenter Server requirements for deploying Site Recovery Manager
- Define Site Recovery Manager virtual appliance system requirements
- Deploy the Site Recovery Manager appliance
- Navigate the Site Recovery Manager configuration UI
- Describe the process for registering Site Recovery Manager with vCenter Server
- Describe how to start and stop services in Site Recovery Manager
- Identify ways to perform updates to the Site Recovery Manager appliance
- Describe the options for accessing the Site Recovery Manager
- Describe the process for configuring site pairing
- Describe how to import and export Site Recovery Manager configuration
- Navigate the Site Recovery Manager configuration UI
- Describe the process for registering Site Recovery Manager with vCenter Server
- Describe how to start and stop services in Site Recovery Manager
- Identify ways to perform updates to the Site Recovery Manager appliance
- Describe the options for accessing the Site Recovery Manager
- Describe the process for configuring site pairing
- Describe how to import and export Site Recovery Manager configuration

### 4 Configuring Inventory Mappings

- Explain the importance of inventory mappings
- Identify configuration options for inventory mappings
- Describe the importance of placeholder virtual machines and datastores
- Describe the importance of the vSphere inventory changes for Site Recovery Manager operation

### 5 Using Array-Based Replication

- Describe array-based replication
- Describe Storage Replication Adapters and explain their role for the array-based replication
- Describe the concept and configuration of array pairs
- Describe datastore groups and the relationship between devices and datastore groups
- Describe the role of consistency groups
- Identify the advantages of array-based replication

### 6 vSphere Replication

- Describe Site Recovery Manager with vSphere Replication Architecture
- Discuss the role of vSphere Replication components
- Discuss use cases for vSphere Replication
- Discuss system requirements and operational limits of vSphere Replication
- Determine how to calculate bandwidth requirements for vSphere Replication
- Identify the advantages of vSphere Replication
- Deploy a vSphere Replication appliance
- Configure a vSphere Replication appliance and register it with vCenter Server
- Pair vSphere Replication appliances
- Deploy an additional vSphere Replication server
- Register a vSphere Replication server with a vSphere Replication management server

### 7 Replicating VMs Using vSphere Replication

- Describe the replication process used by vSphere Replication
- List vSphere Replication replica states
- Describe vSphere Replication of encrypted virtual machines
- Describe vSphere native key provider
- Describe how to configure vSphere Replication
- Discuss vSphere Replication RPO

### 8 Protection Groups

- Define protection group functionality
- Examine the differences between array-based protection groups, protection groups based on vSphere Replication, and Virtual Volumes protection groups
- Create a protection group
- View a placeholder virtual machine in the inventory
- Configure protection for virtual machines and edit protection groups

### 9 Recovery Plans

- Discuss recovery plan concepts
- Discuss network planning
- Discuss the organization of storage for recovery plans
- Describe customization options in recovery planning
- Describe priority groups and VM dependencies
- Describe how to implement a recovery plan
- Configure VM recovery plan properties
- Describe the customization of recovery plans
- Configure additional steps in the recovery plan
- Delete a recovery plan

### 10 Executing Recovery Plans

- Discuss use cases for Site Recovery Manager
- Describe planned migration
- Identify Site Recovery Manager workflows
- Examine Site Recovery Manager integration with various vSphere technologies
- Describe how to conduct a recovery plan test
- Perform a recovery plan test
- Identify the effect on the storage layer during the test recovery steps
- Review the recovery plan test steps
- Describe how to cancel a recovery plan test and clean up after recovery plan test cancellation
- Explain a recovery plan execution in planned migration or disaster recovery mode
- Identify the recovery steps for each execution type
- Describe a forced recovery
- Explain the importance of re-protection processes and states
- Examine failback steps
- Describe how to re-protect a data center

### 11 Monitoring and Troubleshooting

#### settings

- Describe MPIT instances
- Describe additional vSphere Replication settings
- Describe how to disable vSphere Replication

- Identify Site Recovery Manager alarm options
- Generate Site Recovery Manager recovery plan history reports
- Configure Site Recovery Manager advanced settings
- Identify Site Recovery Manager logs
- Describe the vRealize Operations management pack for Site Recovery Manager

---

## Autres moyens pédagogiques et de suivi:

- Compétence du formateur : Les experts qui animent la formation sont des spécialistes des matières abordées et ont au minimum cinq ans d'expérience d'animation. Nos équipes ont validé à la fois leurs connaissances techniques (certifications le cas échéant) ainsi que leur compétence pédagogique.
- Suivi d'exécution : Une feuille d'émargement par demi-journée de présence est signée par tous les participants et le formateur.
- En fin de formation, le participant est invité à s'auto-évaluer sur l'atteinte des objectifs énoncés, et à répondre à un questionnaire de satisfaction qui sera ensuite étudié par nos équipes pédagogiques en vue de maintenir et d'améliorer la qualité de nos prestations.

#### Délais d'inscription :

- Vous pouvez vous inscrire sur l'une de nos sessions planifiées en inter-entreprises jusqu'à 5 jours ouvrés avant le début de la formation sous réserve de disponibilité de places et de labs le cas échéant.
- Votre place sera confirmée à la réception d'un devis ou "\*\*\*\*\*booking form\*\*\*\*\*" signé. Vous recevrez ensuite la convocation et les modalités d'accès en présentiel ou distanciel.
- Attention, si cette formation est éligible au Compte Personnel de Formation, vous devrez respecter un délai minimum et non négociable fixé à 11 jours ouvrés avant le début de la session pour vous inscrire via [moncompteformation.gouv.fr](http://moncompteformation.gouv.fr).

#### Accueil des bénéficiaires :

- En cas de handicap : plus d'info sur [globalknowledge.fr/handicap](http://globalknowledge.fr/handicap)
- Le Règlement intérieur est disponible sur [globalknowledge.fr/reglement](http://globalknowledge.fr/reglement)
