

## DevOps Institute: Value Stream Management (VSM) Foundation - Including Exam

Durée: 2 Jours    Réf de cours: VSMF    Méthodes d'apprentissage: Classe à distance

---

### Résumé:

The Value Stream Management Foundation course from Value Stream Management Consortium, and offered in partnership with DevOps Institute, is an introductory course taking learners through a value stream management implementation journey. It considers the human, process, and technology aspects of this way of working and explores how optimizing value streams for flow and realization positively impacts organizational performance.

Classe à Distance - site Client

Cette formation peut être suivie à distance en synchrone depuis n'importe quel site pourvu d'une connexion internet (2 Mb/s en symétrique recommandés). Le programme (théorie et pratique) suit le même déroulé pédagogique qu'en présentiel. La solution technologique adoptée permet aux apprenants à distance de suivre les présentations faites au tableau, de voir et d'entendre l'instructeur et les participants en temps réel, mais également d'échanger avec eux.

---

### Public visé:

People working in an organization aiming to improve performance, especially in response to digital transformation or disruption. Any roles involved in the creation and delivery of products or services: Leadership and CXO, especially CIO, CTO, CPO, and CVO Transformation and evolution leads and change agentsValue stream architects, managers, engineers Scrum Masters, agile and DevOps coaches and facilitatorsPortfolio, product and project managers, and ownersBusiness analystsArchitects, developers, and engineersRelease and environment managersIT Ops, service and support desk workersCustomer experience and success professionals

---

### Objectifs pédagogiques:

- Describe the origins of value stream management and key concepts such as flow, value, and delivery
- Apply metrics such as touch/processing time, wait/idle time, and cycle time to value streams
- Describe what value stream management is, why its needed and the business benefits of its practice
- Understand flow metrics and how to access the data to support data-driven conversations and decisions
- Describe how lean, agile, DevOps, and ITSM principles contribute to value stream management
- Examine value realization metrics and aligning to business outcomes, and how to
- Identify and describe value streams, where they start and end, and how they interconnect
- sense and respond to them (outcomes versus outputs)
- Identify value stream roles and responsibilities
- Architect a DevOps toolchain alongside a value stream and data connection points
- Express value streams visually using mapping techniques, define current and target states and hypothesis backlog
- Design a continuous inspection and adaptation approach for organizational evolution
- Write value stream flow and realization optimization hypotheses and experiments

### Pré-requis:

None, although having a working knowledge of lean, agile, DevOps, and value stream principles will be useful.

### Autres moyens pédagogiques et de suivi:
