
GDPR - Certified Information Privacy Manager

Duration: 2 Days Course Code: CIPM Delivery Method: Virtual Learning

Overview:

The CIPM is the world's first and only certification in privacy program management. When you earn a CIPM, it shows that you know how to make a privacy program work for your organization. In other words, you're the go-to person for day-to-day operations when it comes to data protection.

The CIPM program was developed by the International Association of Privacy Professionals (IAPP), which is the world's largest comprehensive global information privacy community and resource. The CIPM certification also holds accreditation under ISO 17024: 2012.

All students will receive official IAPP resources as well as One Year IAPP membership.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

How to create a company vision
How to structure the privacy team
How to develop and implement a privacy program framework
How to communicate to stakeholders
How to measure performance
The privacy program operational lifecycle

Objectives:

- The General Data Protection Regulation (GDPR) takes effect in 2018, are you ready for it? Among its mandates is the requirement to appoint a knowledgeable Data Protection Officer (DPO) tasked with monitoring compliance, managing internal data protection activities, training data processing staff, conducting internal audits and more. There's a lot to know, there's a lot at stake and there's a lot of opportunity for data protection professionals with the right training and education.
 - Achieving a CIPM credential shows that you have a comprehensive knowledge of how data protection programs should work across an organization. Add a CIPP/E credential and prove that you not only can manage a data protection program, but you understand the regulations that govern them.
 - With a CIPM and CIPP/E combined you'll be uniquely equipped to fulfill the DPO requirements of the GDPR. The CIPP/E relates to the knowledge a DPO must have concerning the European legal framework of the legislation, and the CIPM provides theoretical aspects necessary to lead an organization's data protection policy.
-

Testing and Certification

Certified Information Privacy Manager (CIPM)
