

GDPR - Certified Information Privacy Professional/Europe (CIPP/EU)

Duration: 2 Days Course Code: CIPPE Delivery Method: Virtual Learning

Overview:

In this course you will gain foundational knowledge on both broad and global concepts of privacy and data protection laws and practice. You will learn common principles and approaches to privacy as well as understand the major privacy models employed around the globe. An introduction to information security concepts and information security management and governance will be covered including frameworks, controls, and identity and access management. You will also learn about online privacy as it relates to using personal information on websites and other internet-related technologies.

This course delves into the context of European data protection law: origins, institutions and legislative framework; data protection concepts, principles and application, including processing criteria, obligations, data subject rights, confidentiality and security, notification requirements, international data transfers, and supervision and enforcement; and European data protection practices related to employment, surveillance, direct marketing and outsourcing.

The CIPP/E designation is accredited under the internationally recognized ANSI/ISO standard 17024:2012, an acknowledgement of the quality and integrity of the programme.

This two-day program covering the principals of information privacy in the U.S. private-sector includes:

Official IAPP CIPP/E Participant Guide

Official IAPP CIPP/E Textbook

Official IAPP CIPP/E Practice Test

IAPP CIPP/E Certification Exam Voucher

One-Year IAPP Membership

Your contact information must be provided to the IAPP for membership services fulfilment

All students will receive official IAPP resources as well as One Year IAPP membership.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Individuals who need a foundational understanding of information privacy and data protection and those interested in pursuing CIPP/E certification.

Testing and Certification

Certified Information Privacy Professional – Europe (CIPP/E)

Content:

Day One	Unit 3: Information Security: Safeguarding Personal Information	Unit 1: Introduction to European Data Protection
Module 1: Fundamentals of Information Privacy	This unit presents introductions to information security, including definitions, elements, standards, and threats/vulnerabilities, as well as introductions to information security management and governance, including frameworks, controls, cryptography, and identity and access management (IAM).	This unit introduces the origins and historical context for privacy in Europe, the European regulatory institutions and the legislative framework for current EU data protection law at both the EU and state level.
Unit 1: Common Principles and Approaches to Privacy		Unit 2: European Data Protection Law and Regulation
This unit includes a brief discussion about the modern history of privacy, an introduction to types of information, an overview of information risk management and a summary of modern privacy principles.	Unit 4: Online Privacy: Using Personal Information on Websites and with Other Internet-related Technologies	This unit takes an in-depth look at data protection concepts, application of the law, data protection principles, legitimate processing criteria, information provision obligations, data subject rights, confidentiality and security, notification requirements, international data transfers, and supervision and enforcement.
Unit 2: Jurisdiction and Industries	This unit discusses the web as a platform, as well as privacy considerations for sensitive online information, including policies and notices, access, security, authentication identification and data collection. Additional topics include children's online privacy, email, searches, online marketing and advertising, social media, online assurance, cloud computing, and mobile devices.	Unit 3: Compliance with European Data Protection Law and Regulation
This unit introduces the major privacy models employed around the globe and provides an overview of privacy and data protection regulation by jurisdictions and by industry sectors.	Day Two	This unit examines the employment relationship, surveillance activities, marketing activities, internet technology and communications, and outsourcing.
	Module 2: European Privacy
