

Introduction to 802.1X Operations for Cisco Security Professionals

Cursusduur: 3 Dagen Cursuscode: 8021X Version: 3.0 Trainingsmethode: Virtual Learning

Beschrijving:

The **Introduction to 802.1X Operations for Cisco Security Professionals (802.1X)** training teaches you to manage Cisco IBNS with Catalyst switches, 9800 Controllers, and Meraki.

The Introduction to 802.1X Operations for Cisco Security Professionals (802.1X) training shows you how to configure and prepare to deploy Cisco® Identity-Based Networking Services (IBNS) solutions based on Cisco Catalyst switches, Cisco 9800 LAN Controllers, and Cisco Meraki deployments. You will learn the fundamentals of the 802.1X protocol and configuration, Cisco IBNS, configuring access for non-suppliant devices, architectural components, and considerations with 802.1X. This training also earns you 12 Continuing Education (CE) credits toward recertification.

Updated 11/06/2026

Virtueel en Klassikaal™

Virtueel en Klassikaal™ is een eenvoudig leerconcept en biedt een flexibele oplossing voor het volgen van een klassikale training. Met Virtueel en Klassikaal™ kunt u zelf beslissen of u een klassikale training virtueel (vanuit huis of kantoor) of fysiek op locatie wilt volgen. De keuze is aan u! Cursisten die virtueel deelnemen aan de training ontvangen voor aanvang van de training alle benodigde informatie om de training te kunnen volgen.

Doelgroep:

This class is intended for the following participants:

- Security Administrators
- Security Consultants
- Network Administrators
- System Engineers
- Technical Support Personnel
- Channel Partners and Resellers

Doelstelling:

- This course will help you:
- Identify Cisco IBNS operation and how 802.1X functions as part of the IBNS solution
- Compare the different types of EAP authentication to select the best method for a solution deployment
- Configure Cisco Catalyst switches for 802.1X access
- Configure Cisco Wireless LAN Controllers for 802.1X access
- Configure Meraki devices for 802.1X access
- Apply MAB and guest services to integrate devices without direct 802.1X support to the network
- Explain network design considerations and troubleshooting for Cisco IBNS

Vereiste kennis en vaardigheden:

There are no prerequisites for this training. However, the knowledge and skills you are recommended to have before attending this training are:

- Basic routing and switching knowledge
These skills can be found in the following Cisco Learning Offering:
- CCNA - Implementing and Administering Cisco Solutions

Vervolgcurssussen:

- SISE - Implementing and Configuring Cisco Identity Services Engine
-

Cursusinhoud:

Course Outline

- Introduction to Cisco IBNS
- 1X EAP Authentication
- 1X on Cisco Catalyst Switches
- 1X on Cisco Wireless LAN Controllers
- 1X on Meraki Devices
- Network Access for Non-Supplicant Devices
- Design Considerations and Troubleshooting for Cisco IBNS Networks

Lab Outline

- Configure an 802.1X Supplicant for Tunneled EAP (TEAP)
 - Configure Cisco Catalyst Switch for IEEE 802.1X
 - 1X Configuration on Cisco Wireless LAN Controllers
 - 1X Configuration on Meraki Devices
 - Configure MAC Authentication Bypass on Cisco Network Devices
 - Troubleshoot Cisco IBNS Networks
-
