Doelgroep:

Application Consultant Business Process Architect Enterprise Architect Solution Architect System Architect Technology Consultant

Doelstelling:

- This course will prepare you to:
- This seminar focuses on the architecture, sizing and configuration of Azure components that meet the specific requirements of a highly available high-performance SAP S/4 HANA landscape for test, quality assurance and productive systems. Learned best practices are implemented on SAP systems in the Azure Cloud.
- Solutions architects and consultants are not only instructed in the design of a high-availability SAP Landscape but are also considered from a cost optimization perspective. Using concrete examples, various scenarios and reference architectures for a high-performance "SAP on Azure" cloud infrastructure will be presented.
- The subsequent project steps necessary for the implementation or migration of an SAP Landscape, from the network via storage and server, for the SAP-specific application and database instances, are planned and set up as templates or blueprints in the Azure Cloud.
- Attending this seminar enables you to participate in the Microsoft certification AZ-120 "Planning and Administering Microsoft Azure for SAP Workloads".
