ONTAP NFS Administration

Cursusduur: 1 Dag **Cursuscode: NEP_OT-NFS-A** **Trainingsmethode: Virtual Learning**

Beschrijving:

Explore and understand the core NFS protocol features and functionality in NetApp® ONTAP ® environments. Learn to use ONTAP management interfaces, configure and set up NFS, and understand NFS access workflows. Perform administration tasks for NFSv3 and NFSv4, enable multiprotocol data access, and use tools to monitor and manage NFS operations. Hands-on exercises are included to reinforce key concepts and practical skills.

Updated October 2026

Virtueel en Klassikaal™

Virtueel en Klassikaal™ is een eenvoudig leerconcept en biedt een flexibele oplossing voor het volgen van een klassikale training. Met Virtueel en Klassikaal™ kunt u zelf beslissen of u een klassikale training virtueel (vanuit huis of kantoor)of fysiek op locatie wilt volgen. De keuze is aan u! Cursisten die virtueel deelnemen aan de training ontvangen voor aanvang van de training alle benodigde informatie om de training te kunnen volgen.

Doelgroep:

This class is intended for the following participants:
- Systems Administrators
- Storage Administrators
- Enterprise Architects

Doelstelling:

- This course focuses on enabling you to do the following:
- Describe the core features and functionality of the NFS protocol
- Identify and use the interfaces for managing ONTAP software
- Set up and configure NFS in the ONTAP environment
- Illustrate the workflow to access NFS files and folders
- Administer and manage both NFSv3 and NFSv4 protocols
- Configure ONTAP software to enable multiprotocol data access
- Monitor and manage NFS operations

Vereiste kennis en vaardigheden:

Participants should have knowledge of:

- ONTAP Cluster Fundamentals
- ONTAP Cluster Administration
- ONTAP NAS Fundamentals
- Working knowledge of UNIX and Linux operating systems of NFS

Examens en certificering

- None

Vervolgcursussen:

- None

Cursusinhoud:

This course includes the following modules, lessons, and exercises:

Module 1: Getting started

Lessons of Module 1

- Introduction to NFS
- NFS access flow
- Authentication and authorization
- Basic storage VM configuration
- Interfaces for managing ONTAP based systems

Exercises of Module 1

- Configuring a storage VM

Module 2: Log in to Linux client

Lessons of Module 2

- UNIX user concepts
- User authentication mechanisms

Exercises of Module 2

- Logging in to Linux client

Module 3: Mount NFS volume

Lessons of Module 3

- NFS service and networking
- Volumes, qtrees, and namespaces
- Export policies, DNS, and NIS

Exercises of Module 3

- Configuring networking and NFS service
- Creating volumes and junction paths
- Creating export policies and rules for volumes

Module 4: Access files and folders

Lessons of Module 4

- UNIX user authorization concepts

Exercises of Module 4

- Applying permissions and accessing files

Module 5: Advanced NFS configuration

Lessons of Module 5

- Managing NFSv4 configuration
- Centralized name services
- File locking
- AUTH_SYS extended groups
- NFSv4 ACLs

Exercises of Module 5

- Managing NFSv4

Module 6: Multiprotocol configuration

Lessons of Module 6

- Multiprotocol configuration
- Name mapping

Exercises of Module 6

- Configuring a storage VM for multiprotocol access

Appendix: Monitoring and managing NFS

Lessons of Appendix

- Monitor NFS active clients
- Collecting NFS statistics and data

Exercises of Appendix

- Monitoring NFS performance
