

## Developing Advanced Automation with Red Hat Ansible Automation Platform

Cursusduur: 4 Dagen    Cursuscode: AU374    Trainingsmethode: Maatwerk

### Beschrijving:

**Advance your Ansible skills and develop automation that scales by applying recommended practices with the new, container-focused tools from Red Hat Ansible Automation Platform.**

Developing Advanced Automation with Red Hat Ansible Automation Platform (AU374) is designed for automation content developers to use the container-focused tools from Red Hat® Ansible Automation Platform to efficiently develop automation that can be managed through the Ansible Automation Platform unified UI.

Learn recommended practices for automation development using reusable code, advanced playbook techniques, shared automation execution environments, and preparing for scalable automation with automation content navigator.

Use Red Hat Ansible Automation Platform to develop automation in a way that scales to large teams and complex enterprises.

In this course you will gain the skills to effectively manage and optimize playbooks, create and share automation execution environments and collections, and learn how to use automation content navigator for managing the automation lifecycle.

This course is based on Red Hat Ansible Automation Platform 2.5.

**Note :** Starting January 1, 2026, Red Hat introduces RHLS-Course — a flexible subscription model now included with this catalog offering. This replaces the previous direct virtual class enrollment from Global Knowledge.

When you purchase this item, you'll receive an RHLS subscription at the course level, giving you the freedom to choose the schedule that works best and self-enroll in your selected class.

Your RHLS subscription includes:

- One live, instructor-led virtual session
- 12 months of self-paced learning access
- One certification exam with a free retake

Onsite Classroom-based sessions and closed course options remain unchanged.

Updated Jan2026

### Maatwerk

Global Knowledge biedt zowel standaard- als maatwerk cursussen die zijn afgestemd op uw wensen en die als besloten cursus op uw eigen locatie of onze locatie gevolgd kunnen worden.

### Doelgroep:

This course is designed for users who create automation content, including these roles: Developers DevOps engineers Linux system administrators Other IT professionals with some experience using Red Hat Ansible Automation Platform to automate, provision, configure, and deploy applications and services in a Linux environment

### Doelstelling:

- |   |   |
|---|---|
| <ul style="list-style-type: none"> <li>■ After this course participants should be able to:</li> <li>■ Use the capabilities of automation content navigator to develop Ansible Playbooks.</li> <li>■ Apply recommended practices for effective and efficient automation with Ansible.</li> </ul> | <ul style="list-style-type: none"> <li>■ Use advanced features of Red Hat Ansible Automation Platform to work with data, including filters and plug-ins.</li> <li>■ Perform automation operations as rolling updates.</li> <li>■ Create automation execution environments to bundle and distribute the dependencies needed to run automation code.</li> </ul> |
|---|---|

### Vereiste kennis en vaardigheden:

- Red Hat Enterprise Linux Automation with Ansible (RH294)
  - Be a Red Hat Certified Engineer (RHCE®) on Red Hat Enterprise Linux 9 or later, or demonstrate equivalent Ansible experience
- Take Red Hat free assessment to gauge whether this offering is the best fit for your skills [Red Hat Skills Assessment](#)

### Examens en certificering

- Red Hat Certified Specialist in Developing Automation with Ansible Automation Platform exam (EX374)

---

## Vervolgcurssussen:

Continue building automation skills with:

- Red Hat Services Management and Automation (RH358)
  - Managing Enterprise Automation with Red Hat Ansible Automation Platform (DO467 - AU467)
  - Microsoft Windows Automation with Red Hat Ansible (DO417 - AU417)
  - Ansible for Network Automation (DO457- AU457)
- 

## Cursusinhoud:

Develop Playbooks with Ansible Automation Platform 2	Work with Ansible Configuration Settings	Transform Data with Filters and Plug-ins
Develop Ansible Playbooks with Red Hat Ansible Automation Platform 2 by following recommended practices.	Examine and adjust the configuration of Ansible and automation content navigator to simplify development and to troubleshoot issues.	Populate, manipulate, and manage data in variables using filters and plug-ins.
Manage Ansible Content Collections and Automation Execution Environments	Manage Inventories	Coordinate Rolling Updates
Run playbooks that use content collections not included in ansible-core, either from an existing execution environment or by downloading them from the automation hub.	Manage inventories by using advanced features of Ansible.	Use advanced features of Ansible to manage rolling updates in order to minimize downtime and to ensure maintainability and simplicity of Ansible Playbooks.
Run Playbooks with Automation Controller	Manage Task Execution	Create Ansible Content Collections and Automation Execution Environments
Explain what automation controller is and demonstrate how to use it to run playbooks that you developed with automation content navigator.	Control and optimize the execution of tasks by Ansible Playbooks.	Write your own Ansible Content Collections, publish them, embed them in a custom automation execution environment, and run them in playbooks by using automation controller.
