

IBM QRadar SIEM Foundations

Duration: 3 Days **Course Code: BQ104G** **Delivery Method: Virtual Learning**

Overview:

IBM Security QRadar enables deep visibility into network, endpoint, user, and application activity. It provides collection, normalization, correlation, and secure storage of events, flows, assets, and vulnerabilities. Suspected attacks and policy breaches are highlighted as offenses. In this course, you learn about the solution architecture, how to navigate the user interface, and how to investigate offenses. You search and analyze the information from which QRadar concluded a suspicious activity. Hands-on exercises reinforce the skills learned.

In this 3-day instructor-led course, you learn how to perform the following tasks: Describe how QRadar collects data to detect suspicious activities Describe the QRadar architecture and data flows Navigate the user interface Define log sources, protocols, and event details Discover how QRadar collects and analyzes network flow information Describe the QRadar Custom Rule Engine Utilize the Use Case Manager app Discover and manage asset information Learn about a variety of QRadar apps, content extensions, and the App Framework Analyze offenses by using the QRadar UI and the Analyst Workflow app Search, filter, group, and analyze security data Use AQL for advanced searches Use QRadar to create customized reports Explore aggregated data management Define sophisticated reporting using Pulse Dashboards Discover QRadar administrative tasks

Extensive lab exercises are provided to allow students an insight into the routine work of an IT Security Analyst operating the IBM QRadar SIEM platform. The exercises cover the following topics: Architecture exercises UI Overview exercises Log Sources exercises Flows and QRadar Network Insights exercises Custom Rule Engine (CRE) exercises Use Case Manager app exercises Assets exercises App Framework exercises Working with Offenses exercises Search, filtering, and AQL exercises Reporting and Dashboards exercises QRadar Admin tasks exercises

The lab environment for this course uses the IBM QRadar SIEM 7.4 platform.

Virtueel en Klassikaal™

Virtueel en Klassikaal™ is een eenvoudig leerconcept en biedt een flexibele oplossing voor het volgen van een klassikale training. Met Virtueel en Klassikaal™ kunt u zelf beslissen of u een klassikale training virtueel (vanuit huis of kantoor) of fysiek op locatie wilt volgen. De keuze is aan u! Cursisten die virtueel deelnemen aan de training ontvangen voor aanvang van de training alle benodigde informatie om de training te kunnen volgen.

Target Audience:

This course is designed for security analysts, security technical architects, offense managers, network administrators, and system administrators using QRadar SIEM.

Objectives:

- After completing this course, you should be able to perform the following tasks:
 - Describe how QRadar collects data to detect suspicious activities
 - Describe the QRadar architecture and data flows
 - Navigate the user interface
 - Define log sources, protocols, and event details
 - Discover how QRadar collects and analyzes network flow information
- Learn about a variety of QRadar apps, content extensions, and the App Framework
- Analyze offenses by using the QRadar UI and the Analyst Workflow app
- Search, filter, group, and analyze security data
- Use AQL for advanced searches
- Use QRadar to create customized reports
- Explore aggregated data management

- Describe the QRadar Custom Rule Engine
- Utilize the Use Case Manager app
- Discover and manage asset information
- Define sophisticated reporting using Pulse Dashboards
- Discover QRadar administrative tasks

Prerequisites:

Before taking this course, make sure that you have the following skills:

- IT infrastructure
- IT security fundamentals
- Linux
- Windows
- TCP/IP networking
- Syslog

Content:

Unit 12: QRadar Admin Console
