

Implementing with SAP Cloud ALM

Cursusduur: 2 Dagen Cursuscode: CALM20 Trainingsmethode: Maatwerk

Beschrijving:

SAP Cloud ALM is the Application Lifecycle Management offering for the implementation and operation of cloud-based and hybrid SAP system landscapes. Users benefit from a native cloud solution that was developed as a central entry point for the management and automated operation of SAP landscapes as well as for the implementation of SAP solutions. In this course, participants will gain a detailed and at the same time practical insight into the use of SAP Cloud ALM for Implementation. The focus here is on the possibilities for an accelerated introduction of SAP solutions. In the training, the methodology and functionalities of SAP Cloud ALM are presented, and their application is trained in numerous practical exercises. As a result of the training, participants will be able to apply SAP Cloud ALM for Implementations and will also be able to convey the benefits of the integrated methodology.
