Are you GDPR-ready?

The General Data Protection Regulation (GDPR) takes effect in 2018, are you ready for it? Among its mandates is the requirement to appoint a knowledgeable Data Protection Officer (DPO) tasked with monitoring compliance, managing internal data protection activities, training data processing staff, conducting internal audits and more. There's a lot to know, there's a lot at stake and there's a lot of opportunity for data protection professionals with the right training and education.

Achieving a CIPP/E and CIPT credential shows you have the comprehensive GDPR knowledge, perspective and understanding to ensure compliance and data protection success in Europe—and to take advantage of the career opportunity this sweeping legislation represents. The CIPP/E part of this training encompasses pan-European and national data protection laws, key data protection terminology and practical concepts concerning the protection of personal data and trans-border data flows. The CIPT part of this training gives you knowledge how to build your organisation's data protection structures from the ground up. With regulators worldwide calling for tech professionals to factor data protection into their products and services, the job market for privacy-trained IT pros has never been stronger.

Whether you work in the public or private sector, data privacy skills are quickly becoming a must-have—and that's a great opportunity for you. This four-day programme covering the principals of information privacy, principles of data protection in Europe and principles of privacy in technology includes:

Official IAPP CIPP/E and CIPT Participant Guides
