

Develop extensions with CAP following the SAP BTP Developer's Guide

Cursusduur: 2 Dagen Cursuscode: CLD200 Trainingsmethode: Virtual Learning

Beschrijving:

In this course you will gain an overview of key features, tools and services that are part of the SAP Business Technology Platform. You will learn how to develop extensions within SAP BTP based on the SAP Cloud Application Programming Model following the SAP Developer's Guide. You will enrich your extension with an SAP Fiori Elements user interface, custom code, external service and security features. Finally, deploying your extension and integrating you app to SAP Build Workzone, standard edition. This course is also available in a self-paced e-learning format as part of a free learning journey on learning.sap.com

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Doelgroep:

- Application Consultant
- Developer
- Development Consultant
- Enterprise Architect
- Solution Architect
