

Commvault Professional V11 + exam voucher

Cursusduur: 3 Dagen Cursuscode: COMMPROF-F

Beschrijving:

In this Commvault® course, you will learn how to effectively manage your Commvault® environment using the Command Center. You will start with the fundamentals, including key terminology, system architecture, and navigating the Command Center interface. From there, you will configure storage, security policies, and network settings to ensure your data flows securely and efficiently through your infrastructure. Once the basic configuration is in place, you will further tailor Commvault® to support different types of workloads. You will learn how to create and manage backups, restore data when needed, and set up schedules for optimal performance. The course concludes with monitoring and management, where you will use dashboards, alerts, and reports to maintain visibility, control, and reliability across your Commvault® environment.
