

DASA DevOps Specify and Verify – Including Exam

Cursusduur: 2 Dagen Cursuscode: DASADEV-SV Trainingsmethode: Virtual Learning

Beschrijving:

Master the integration of customer requirements into IT products and services. The DASA DevOps Specify and Verify Certification equips you with the skills, mindset, and behaviors to ensure customer needs are accurately understood and met by your team—while embedding testing, security, and compliance into the development lifecycle for faster, high-quality releases.

Virtueel en Klassikaal™

Virtueel en Klassikaal™ is een eenvoudig leerconcept en biedt een flexibele oplossing voor het volgen van een klassikale training. Met Virtueel en Klassikaal™ kunt u zelf beslissen of u een klassikale training virtueel (vanuit huis of kantoor) of fysiek op locatie wilt volgen. De keuze is aan u! Cursisten die virtueel deelnemen aan de training ontvangen voor aanvang van de training alle benodigde informatie om de training te kunnen volgen.

Doelgroep:

The DASA DevOps Professional – Specify and Verify certification is primarily aimed at: Individuals involved in IT development, IT operations, or IT Service Management
Individuals whose role are affected by DevOps and continuous delivery, such as:

- DevOps engineers
- Business Analysts
- Testers
- Architects
- UX and Interaction Designers
- (aspiring) Product Owners
- Integration Specialists
- Operations Managers
- Incident and Change Managers
- System and Network Administrators
- Business Managers

Doelstelling:

- After completing this program, you will be able to:
- Understand how the tasks covering specification and verification fit into a DevOps environment.
- Take **end-to-end responsibility** for your product – from concept to grave.
- Truly **understand your customers** and validate whether the product fits their needs.
- Find good ways to **communicate** with everyone involved, from customers to stakeholders and developers.
- **Describe and visualize** your product in a format that fits your specific situation.
- Understand what software quality means and how to achieve adequate quality with your product.
- Decide adequately which kind of tests the **product needs**, and understand what you gain from them.
- Set up **useful** feedback loops, and use them meaningfully.
- Understand which architectural considerations are important in a DevOps environment.

Vereiste kennis en vaardigheden:

- Required: DASA DevOps Fundamentals certificate
- Beneficial: Familiarity with Agile, Scrum, Lean, and basic knowledge of specification and testing.

Examens en certificering

Cursusinhoud:

Welcome and Introduction

- Welcome
- Icebreaker
- Let's Get To Know Each Other
- Best Practices for a Good Online Training
How Will We Interact?

Course Introduction

- DASA DevOps Professional: Specify and Verify Course
- Course Learning Outcomes
- DevOps Professional: Specify and Verify and the DASA Competence
- Framework Module Structure
- Course Agenda
- DASA DevOps Certification Scheme

Module 1: Thinking About Quality and Value

- Intent and Context
- Module Objectives
- Topics Covered
- Quality and Value
- DevOps View on Quality Assurance DevOps Approach to Quality Assurance
- Human-Technical Systems
- Key Takeaways
- Module-End Questions

Module 2: Delivering Value

- Intent and Context
- Module Objectives
- Topics Covered
- The Product Lifecycle
- Taking an Economic Perspective Value Stream Mapping
- Key Takeaways
- Module-End Questions

Module 3: Understanding Your Customers

- Intent and Context
- Module Objectives
- Topics Covered
- Customers and Stakeholders
- Identifying and Interacting With Customers Gathering Requirements From Stakeholders Key Takeaways
- Module-End Questions

Module 4: Designing the Right Product

- Intent and Context
- Module Objectives
- Topics Covered
- The Right Product
- Lean User Experience
- Structuring Requirements for Products Key Takeaways
- Module-End Questions

Module 5: Architecting for DevOps

- Intent and Context
- Module Objectives
- Topics Covered
- Introduction to Architecture
- Architecture and Teams
- Fundamental Considerations About Architecture Practical Architecture Work
- Key Takeaways
- Module-End Questions

Module 6: Practical Value Assurance in DevOps

- Intent and Context
- Module Objectives
- Topics Covered
- Testing and Other VA Techniques
- How to Test Well
- Common Testing Practices and Approaches Value Assurance in DevOps
- Testing in DevOps
- Key Takeaways
- Module-End Questions

Module 7: Monitoring and Testing in Production

- Intent and Context
- Module Objectives
- Topics Covered
- What Is Monitoring
- Value Assurance in Production Monitoring and Testing Postmortems
- DevOps Approach to Monitoring Key Takeaways
- Module-End Questions
