

Red Hat OpenShift Developer II: Building and Deploying Cloud-native Applications

Cursusduur: 4 Dagen Cursuscode: DO288 Trainingsmethode: Virtual Learning

Beschrijving:

Design, build, and deploy containerized applications on Red Hat OpenShift

Red Hat OpenShift Developer II: Building and Deploying Cloud-native Applications (DO288) provides application developers with the essential skills to design, build, and deploy containerized applications, whether they are migrating existing applications to Red Hat OpenShift, or creating new cloud-native applications.

Whether you are migrating existing applications or writing container-native applications, you will learn how to boost developer productivity powered by Red Hat® OpenShift, a containerized application platform that allows enterprises to manage container deployments and scale their applications using Kubernetes.

As developers seek ways to improve application time to market for minimum viable products, containers and Red Hat OpenShift have quickly become the de facto solution for agile development and application deployment.

This course provides the gateway to organizational and digital transformation by demonstrating the potential of DevOps using a container-based architecture.

A container-based architecture, orchestrated with Kubernetes and Red Hat OpenShift, improves application reliability and scalability while decreasing developer overhead and facilitating continuous deployment.

Red Hat OpenShift provides the ability to consistently develop and deploy these applications in AWS using Red Hat OpenShift Service on AWS (ROSA), in Microsoft Azure using Azure Red Hat OpenShift, or as a self-managed Red Hat OpenShift Container Platform running in public cloud or customer datacenter environments.

The skills you learn in this course can be applied using all versions of Red Hat OpenShift, including Red Hat OpenShift on AWS (ROSA), Azure Red Hat OpenShift (ARO), and Red Hat OpenShift Container Platform.

This course is based on Red Hat OpenShift 4.18.

Note : Starting January 1, 2026, Red Hat introduces RHLS-Course — a flexible subscription model now included with this catalog offering. This replaces the previous direct virtual class enrollment from Global Knowledge.

When you purchase this item, you'll receive an RHLS subscription at the course level, giving you the freedom to choose the schedule that works best and self-enroll in your selected class.

Your RHLS subscription includes:

- One live, instructor-led virtual session
- 12 months of self-paced learning access
- One certification exam with a free retake

Onsite Classroom-based sessions and closed course options remain unchanged.

Updated Jan2026

Virtueel en Klassikaal™

Virtueel en Klassikaal™ is een eenvoudig leerconcept en biedt een flexibele oplossing voor het volgen van een klassikale training. Met Virtueel en Klassikaal™ kunt u zelf beslissen of u een klassikale training virtueel (vanuit huis of kantoor) of fysiek op locatie wilt volgen. De keuze is aan u! Cursisten die virtueel deelnemen aan de training ontvangen voor aanvang van de training alle benodigde informatie om de training te kunnen volgen.

Doelgroep:

Software developers Software architects

Doelstelling:

- | | |
|---|---|
| ■ After this course participants should be able to: | ■ Create and deploy multi-container applications on Red Hat OpenShift |
| ■ Handle features for developers in the Red Hat OpenShift web console | ■ Deploy multi-container applications using Helm Charts and Kustomize |
| ■ Build and publish container images for Red Hat OpenShift | ■ Create health checks to monitor and improve application reliability |
| ■ Manage container deployments on Red Hat OpenShift | ■ Create CI/CD Workflows using Red Hat OpenShift Pipelines |

Vereiste kennis en vaardigheden:

- Complete Red Hat OpenShift Development I: Introduction to Containers with Podman (DO188), or have equivalent knowledge.
 - RHCSA or higher is helpful for navigation and usage of the command line, but it is not required.
- Take Red Hat free assessment to gauge whether this offering is the best fit for your skills [Red Hat Skills Assessment](#)
- DO188 - Red Hat OpenShift Development I: Introduction to Containers with Podman

Examens en certificering

- Red Hat Certified Specialist in OpenShift Application Development exam (EX288)

Vervolg cursussen:

- Developing and Deploying AI/ML Applications on Red Hat OpenShift AI (AI267)
- Building Resilient Microservices with Istio and Red Hat OpenShift Service Mesh (DO328)
- Red Hat Cloud-native Microservices Development with Quarkus (DO378)
- DO244R - Developing Applications with Red Hat OpenShift Serverless and Knative
- EX288 - Red Hat Certified Specialist in OpenShift Application Development exam
- DO328 - Building Resilient Microservices with Istio and Red Hat OpenShift Service Mesh
- DO378 - Red Hat Cloud-native Microservices Development with Quarkus

Cursusinhoud:

Red Hat OpenShift Container Platform for Developers	Build, deploy, and manage the lifecycle of container images by using a container registry.	Deploying Multi-container Applications
Define the Red Hat OpenShift architecture, concepts, and terminology, and set up the developer environment.	Managing Red Hat OpenShift Builds	Deploy multi-container applications by using Red Hat OpenShift templates, Helm charts, and Kustomize.
Deploying Simple Applications	Describe the Red Hat OpenShift build process and build container images.	Continuous Deployment by using Red Hat OpenShift Pipelines
Deploy simple applications by using the Red Hat OpenShift web console and command-line tools.	Managing Red Hat OpenShift Deployments	Implement CI/CD workflows by using Red Hat OpenShift Pipelines.
Building and Publishing Container Images	Describe the different Red Hat OpenShift deployment strategies and how to monitor the health of applications.
