

Data Services - Data Quality Management

Cursusduur: 2 Dagen **Cursuscode: DS30**

Beschrijving:

In Data Services-Data Quality Management, you will learn about cleansing and standardizing address data and non-address data such as names and phone numbers and matching and consolidating records. You will also learn how to parse data from unstructured text such as emails to provide useful and reportable data. As a business benefit, by being able to create efficient data quality projects, you can use the transformed data to help improve operational and supply chain efficiencies, enhance customer relationships, create new revenue opportunities, and optimize return on investment from enterprise applications.

Doelgroep:

Application Consultant Business Analyst Data Consultant / Manager User

Doelstelling:
