

Practical Data Science with Amazon SageMaker

Cursusduur: 1 Dag Cursuscode: GK0630 Trainingsmethode: Virtual Learning

Beschrijving:

Artificial intelligence and machine learning (AI/ML) are becoming mainstream. In this course, you will spend a day in the life of a data scientist so that you can collaborate efficiently with data scientists and build applications that integrate with ML. You will learn the basic process data scientists use to develop ML solutions on Amazon Web Services (AWS) with Amazon SageMaker. You will experience the steps to build, train, and deploy an ML model through instructor-led demonstrations and labs.

Course level: Intermediate

Duration: 1 day

Activities

This course includes presentations, hands-on labs, and demonstrations.

Virtueel en Klassikaal™

Virtueel en Klassikaal™ is een eenvoudig leerconcept en biedt een flexibele oplossing voor het volgen van een klassikale training. Met Virtueel en Klassikaal™ kunt u zelf beslissen of u een klassikale training virtueel (vanuit huis of kantoor) of fysiek op locatie wilt volgen. De keuze is aan u! Cursisten die virtueel deelnemen aan de training ontvangen voor aanvang van de training alle benodigde informatie om de training te kunnen volgen.

Doelgroep:

- Development Operations (DevOps) engineers
 - Application developers
-

Doelstelling:

- | | |
|--|---|
| ■ In this course, you will learn to: | ■ Summarize the steps a data scientist takes to train ML models |
| ■ Discuss the benefits of different types of machine learning for solving business problems | ■ Summarize the steps a data scientist takes to evaluate and tune ML models |
| ■ Describe the typical processes, roles, and responsibilities on a team that builds and deploys ML systems | ■ Summarize the steps to deploy a model to an endpoint and generate predictions |
| ■ Explain how data scientists use AWS tools and ML to solve a common business problem | ■ Describe the challenges for operationalizing ML models |
| ■ Summarize the steps a data scientist takes to prepare data | ■ Match AWS tools with their ML function |
-

Vereiste kennis en vaardigheden:

We recommend that attendees of this course have:

- AWS Technical Essentials
 - Entry-level knowledge of Python programming
 - Entry-level knowledge of statistics
-

Cursusinhoud:

Module 1: Introduction to Machine Learning

- Benefits of machine learning (ML)
- Types of ML approaches
- Framing the business problem
- Prediction quality
- Processes, roles, and responsibilities for ML projects

Module 2: Preparing a Dataset

- Data analysis and preparation
- Data preparation tools
- Demonstration: Review Amazon SageMaker Studio and Notebooks
- Hands-On Lab: Data Preparation with SageMaker Data Wrangler

Module 3: Training a Model

- Steps to train a model
- Choose an algorithm
- Train the model in Amazon SageMaker
- Hands-On Lab: Training a Model with Amazon SageMaker
- Amazon CodeWhisperer
- Demonstration: Amazon CodeWhisperer in SageMaker Studio Notebooks

Module 4: Evaluating and Tuning a Model

- Model evaluation
- Model tuning and hyperparameter optimization
- Hands-On Lab: Model Tuning and Hyperparameter Optimization with Amazon SageMaker

Module 5: Deploying a Model

- Model deployment
- Hands-On Lab: Deploy a Model to a Real-Time Endpoint and Generate a Prediction

Module 6: Operational Challenges

- Responsible ML
- ML team and MLOps
- Automation
- Monitoring
- Updating models (model testing and deployment)

Module 7: Other Model-Building Tools

- Different tools for different skills and business needs
- No-code ML with Amazon SageMaker Canvas
- Demonstration: Overview of Amazon SageMaker Canvas
- Amazon SageMaker Studio Lab
- Demonstration: Overview of SageMaker Studio Lab

(Optional) Hands-On Lab: Integrating a Web Application with an Amazon SageMaker Model Endpoint
