

Introduction to Javascript scripting

Cursusduur: 3 Dagen Cursuscode: GK0780

Beschrijving:

Every time a website responds to movements of your mouse, JavaScript is responsible for it. Knowledge of JavaScript is therefore very useful if you want to create an attractive, interactive website. If you do not have any programming experience it will not be a problem! This course starts with the basics and covers anything that will help any beginner learn Javascript successfully. You build website elements and simple applications, so that you immediately see how JavaScript is used and which applications are possible.

Doelgroep:

Anyone who wants to start programming in Javascript.

Doelstelling:

- At the end of this course you will be able:
 - to understand the use of Javascript
 - to write your first program
 - to use variables
 - to understand arrays
 - to work with operators and expressions
 - to create objects and use them
 - to use callbacks and closures
 - to use events
 - to understand API's and jQuery
-

Vereiste kennis en vaardigheden:

No specific programming knowledge is needed.

Examens en certificering
