

Understanding Project Budget and Accounting

Cursusduur: 1 Dag Cursuscode: GK2950

Beschrijving:

Learn best practices for defining and managing the budget.

Defining and managing the project budget can be a challenge-especially for those of us who are not financial experts. In this short course, you'll learn why it's important to establish how you will manage costs up front, best practices for cost identification and estimating, and how to develop a budget. You'll also discover key metrics that can help you manage the budget throughout the project life cycle. This is a halfday course.

Doelgroep:

Project managers, IT project managers, project coordinators, project analysts, project leaders, senior project managers, team leaders, product managers, program managers, project sponsors, and project team members who want to continue to develop their skills.

Doelstelling:

- Create a cost management plan
