

AWS Jam - Developing

Cursusduur: 1 Dag **Cursuscode:** GK4504JAM **Trainingsmethode:** Class Connect

Beschrijving:

Accelerate your cloud adoption journey. Your team will gain practical knowledge and skills that they can take back and implement into your organizations cloud initiatives. With real-world challenges, your team will be equipped to handle real-world scenarios. AWS Jam is a scenario-based, team-centered 1 day event where participants gain practical experience with a wide range of AWS services. AWS Jam scenarios relate to use cases, domains, and services covered in the classroom training course. The event is gamified with teams competing against each other by scoring points for completing specific challenges. Challenges have varying degrees of difficulty and are therefore worth differing amounts of points. A live leaderboard provides updates on scores and progress throughout the event. Clues and guidance can be provided to help teams move through challenges, but cost points. To play, AWS provides participants and teams with access to pre-created infrastructure.

Class-Connect™ HD

This is live hands-on interactive learning where you can attend a course from different training centres. This premium experience uses HD quality audio and video that connects the classrooms over a high capacity managed network to ensure a 'real time' experience. The instructor will be presenting from one location and students attending from other centres are able to interact with the instructor and other delegates using video and voice conferencing.

Doelgroep:

AWS Developers looking to enhance their real-world practical skills

Doelstelling:

- Immersive engagements encourage you to up-level your skills on AWS
-

Vereiste kennis en vaardigheden:

Prior attendance of the Developing on AWS course (GK4504) is strongly recommended

- GK4504 - Developing on AWS
-
