

AWS Free Class - Generative AI Essentials on AWS

Cursusduur: 1 Dag Cursuscode: GKAW-FOC-GAE Trainingsmethode: Maatwerk

Beschrijving:

This course is free for AWS customers

In this course, you will learn about the fundamental concepts, methods, and strategies for using generative AI. You will gain a solid understanding of use cases where generative AI can provide solutions and address business needs. Additionally, you will learn about practical insights into technologies related to generative AI and how you can use those technologies to solve real-world problems.

By the end of the course, you will explore project planning and how to discuss implementation of generative AI in your organization.

Course level: Fundamental

Duration: 1 day

Activities: This course includes presentations, hands-on labs, demonstrations, and group exercises.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Maatwerk

Global Knowledge biedt zowel standaard- als maatwerk cursussen die zijn afgestemd op uw wensen en die als besloten cursus op uw eigen locatie of onze locatie gevolgd kunnen worden.

Doelgroep:

This course is intended for those with limited prior knowledge of generative AI:

- Business analysts
- IT supports
- Marketing professionals
- Product or project managers
- Line-of-business or IT managers
- Sales professionals

Doelstelling:

- | | |
|--|---|
| ■ In this course, you will learn to: | ■ Describe how to use generative AI responsibly and safely |
| ■ Summarize generative AI concepts, methods, and strategies | ■ Recognize the types of generative AI solutions with specific use cases |
| ■ Discuss the appropriate use of generative AI and machine learning and their technologies | ■ Explain implementation and project planning of generative AI to your organization |

Vereiste kennis en vaardigheden:

None

Examens en certificering

■

Vervolgcurssussen:

GK910010 - Developing Generative AI Applications on AWS

Cursusinhoud:

Module 1: Introducing Generative AI

- Generative AI explained
- Foundation models
- AWS generative AI services
- Demo: Generative AI solution

Module 2: Exploring Generative AI Use Cases

- Identify suitable use cases
- Generative AI applications and use cases
- Explore generative AI use case scenarios
- Use case for class

Module 3: Essentials of Prompt Engineering

- Introduction to prompt engineering
- Prompt design best practices
- Advanced prompting strategies
- Model settings and parameters
- Hands-on Lab: Optimizing Slogan Generation with Amazon Bedrock

Module 4: Responsible AI Principles and Considerations

- Introduction to responsible AI
- Core dimensions of responsible AI
- Generative AI considerations
- Hands-on Lab: Implementing Responsible AI Principles with Amazon Bedrock Guardrails

Module 5: Security, Governance, and Compliance

- Security overview
- Adverse prompts
- Generative AI security services
- Governance
- Compliance

Module 6: Implementing Generative AI Projects

- Introduction – Generative AI application
- Define a use case
- Select a foundational model
- Improve performance
- Evaluate results
- Deploy the application
- Demo: Amazon Q Business

Module 7: Integrating Generative AI into the Development Lifecycle

- Introduction
- Hands-on Lab: Capstone – Creating a Project Plan with Generative AI

Module 8: Course Wrap-up

- Next steps and additional resources
 - Course summary
-
