Analyzing and Visualizing Data in Looker

Cursusduur: 1 Dag Cursuscode: GO9090 Trainingsmethode: Virtual Learning

Beschrijving:

In this course, you learn how to do the kind of data exploration and analysis in Looker that would formerly be done primarily by SQL developers or analysts.

Upon completion of this course, you will be able to leverage Looker's modern analytics platform to find and explore relevant content in your organization's Looker instance, ask questions of your data, create new metrics as needed, and build and share visualizations and dashboards to facilitate data-driven decision making.

Updated 26/02/2026

Virtueel en Klassikaal™

Virtueel en Klassikaal™ is een eenvoudig leerconcept en biedt een flexibele oplossing voor het volgen van een klassikale training. Met Virtueel en Klassikaal™ kunt u zelf beslissen of u een klassikale training virtueel (vanuit huis of kantoor)of fysiek op locatie wilt volgen. De keuze is aan u! Cursisten die virtueel deelnemen aan de training ontvangen voor aanvang van de training alle benodigde informatie om de training te kunnen volgen.

Doelgroep:

- Business users who need to draw insights from data
- Data analysts who are responsible for data analysis and visualization within their organizations

Doelstelling:

- **Upon completion of the Analyzing and Visualizing Data with Looker course, participants will be able to:**
- Define Looker and the capabilities it provides for working with data
- Use dimensions, measures, and filters to analyze and visualize data
- Use dashboards for multiple visualizations and boards to curate Looker content
- Create advanced metrics by pivoting Looker data and writing table and offset calculations
- Create visualizations using Looks and dashboards
- Share Looker content with others

Vereiste kennis en vaardigheden:

- Notions of data, tables, dashboards.
- SQL queries notions can be helpful but not mandatory

Examens en certificering

Vervolgcursussen:

- GO9077 -

Cursusinhoud:

The Looker platform

- Define the value proposition of the Looker platform.
- Explain Looker's role in the data analysis process.
- Describe Looker's main user interface components.
- Interpret Looker's hierarchical folder structure for content.
- Discuss different content locations within the Looker platform.

Data analysis building blocks

- Define the purpose of a dimension and measure in Looker.
- Identify where end users work with dimensions, measures, and filters.
- Explain how dimensions, measures, and filters contribute to the larger data analysis process in Looker.
- Identify what asset a dimension corresponds to in your database.
- Identify what SQL functions a measure can correspond to.
- Explain how to filter by a dimension.

Working with Looker content

- Explain how to filter within a Look and a dashboard.
- Identify where users can work with dashboards and boards, and filter within Looks and dashboards.
- Explain how dashboards, boards, and filtering can contribute to the data analysis process.
- Define the purpose of a dashboard.
- Explain what a board is in Looker.
- Detail the process of creating a board.
- Detail the process for pinning Looks and dashboards to a board

Customizing Explores

- Explain the process of pivoting data.
- Identify where users can pivot data, write table calculations, and write offset calculations.
- Identify situations to consider pivoting data and writing a new table calculation.
- Explain how pivoting data, writing table calculations, and writing offset calculations can contribute to the data analysis process.
- Differentiate between a table calculation and an offset calculation.
- Discuss the various types of table calculations.
- Detail the process to write table calculations and offset calculations.

Creating new Looker content

- Explain how to create a new Look and dashboard in Looker.
- Identify where users can create new Looks and dashboards.

Sharing Looker data with others

- List the options to share Looks and dashboards once or with a regular schedule.
- Identify where users can send or schedule Looks and dashboards, and configure tile-level dashboard alerts.
- Explain how to configure a shared or scheduled Look or dashboard.
- Discuss how to choose options that are appropriate for a given situation or business case.
- Identify the options to schedule a tile-level dashboard alert.
