

Application Development for SAP HANA

Cursusduur: 3 Dagen Cursuscode: HA450

Beschrijving:

This course will introduce you to development of software applications running on the SAP HANA Platform.

Doelgroep:

Software Developers
Development Consultants

Doelstelling:

- This course will introduce you to development of software applications running on the SAP HANA Platform.
-

Vereiste kennis en vaardigheden:

- - Experience of Object Oriented software development
 - Experience with database development and SQL query
 - Experience of Web development
 - Experience with JavaScript development language
-

Cursusinhoud:

This course is the natural starting point to learn "Native" software development for the SAP HANA Platform. "Native" means "independent from the ABAP world", that is the whole application runs based on the SAP HANA platform, no NetWeaver Application Server is used.

Along the course, you will be guided to "break the ice" with all the development tools and development languages used to realize the different parts of a software application in SAP HANA:

- the User Interface
- the Database,
- the client-server communication services
- the Analytical layer.

At the end, you will be able to code simple but fully functional SAP HANA Software Applications.

Contents:

- Tools for SAP HANA Application Development
 - Introduction to JavaScript
 - User interface: introduction to SAPUI5 Development
 - Database design: introduction to Core Data Services
 - Services: introduction to ODATA
 - The Analytical layer: introduction to Modeling
 - Server-side scripting: Introduction to SQLScript
 - Server-side scripting: Introduction to XS JavaScript
-

Extra informatie:

Course based on software releases SAP HANA SPS10
