## ISO 22301 Lead Auditor (PECB certified) + examen

Cursusduur: 5 Dagen    Cursuscode: IS22301LA    Version: 9.1

---

### Beschrijving:

Gezien het toenemende aantal verstoringen en de onvoorspelbaarheid van rampen van welke aard dan ook (natuurrampen, bedrijfsrampen, rampen op het gebied van informatiebeveiliging), streven organisaties er tegenwoordig naar zich te laten certificeren volgens ISO 22301 om hun betrokkenheid bij de bedrijfscontinuïteit te tonen en ervoor te zorgen dat versturende incidenten worden gedetecteerd en op de juiste manier worden aangepakt, zodat het managementsysteem voortdurend wordt verbeterd. Door PECB-gecertificeerd auditor te worden, verkrijgt u een formele en onafhankelijke erkenning van uw persoonlijke competenties, en kwalificeert u zich om BCMS-audits uit te voeren voor een certificatie-instelling.

PECB erkent het belang van een effectieve audit en de middelen die worden gebruikt om deze succesvol uit te voeren en heeft daarom de ISO 22301 Lead Auditor-opleidingscursus ontworpen. Het volgen van deze training stelt u in staat de kennis en vaardigheden te verkrijgen om audits te plannen en uit te voeren in overeenstemming met ISO 19011 en het certificeringsproces volgens ISO/IEC 17021-1.

Door middel van interactieve sessies, verklarende informatie, oefeningen en vragen voor discussie, zult u in staat zijn om kennis te verwerven over het bedrijfscontinuïteitsmanagementsysteem evenals audittechnieken en bekwaam worden om een BCMS-audit uit te voeren door het toepassen van algemeen erkende auditprincipes, procedures en technieken, en om een auditprogramma en een auditteam te beheren.

Na het volgen van de training kunt u deelnemen aan het examen en, als u met succes slaagt voor het examen, kunt u zich aanmelden voor de "PECB Certified ISO 22301 Lead Auditor" accreditatie. Het internationaal erkende certificaat "PECB Certified ISO 22301 Lead Auditor" bewijst dat u over de professionele capaciteiten en competenties beschikt om organisaties te auditen op basis van de vereisten van ISO 22301 en best practices op auditgebied.

Given the increasing number of disruptions and the unpredictability of disasters of any kind (natural, occupational, information security), organizations nowadays are aiming at getting certified against ISO 22301 in order to show commitment toward business continuity and ensure that disruptive incidents are detected and properly addressed, thus the management system is continually improved. By becoming a PECB certified auditor, you will achieve a formal and independent recognition of your personal competences, and you qualify yourself to conduct BCMS audits for a certification body. Recognizing the importance of an effective audit and the means used to successfully conduct it, PECB has designed the ISO 22301 Lead Auditor training course. Attending this training course allows you to obtain the knowledge and skills to plan and carry out audits in compliance with ISO 19011 and the certification process according to ISO/IEC 17021-1. Through interactive sessions, explanatory information, exercises, and questions for discussion, you will be able to acquire knowledge on the business continuity management system as well as audit techniques and become competent to perform a BCMS audit by applying widely recognized audit principles, procedures, and techniques, and to manage an audit program and an audit team. After attending the training course, you can sit for the exam and, if you successfully pass the exam, you can apply for the "PECB Certified ISO 22301 Lead Auditor" credential. The internationally recognized "PECB Certified ISO 22301 Lead Auditor" certificate will prove that you have the professional capabilities and competences to audit organizations based on the requirements of ISO 22301 and auditing best practices.

---

### Doelgroep:

Auditors seeking to perform and lead business continuity management system (BCMS) audits  
Managers or consultants seeking to master the business continuity management system audit process  
Individuals responsible to maintain conformity with the BCMS requirements in an organization
