

IT Asset Management Foundation (ITAM) - Including Exam

Cursusduur: 2 Dagen Cursuscode: ITAMF Trainingsmethode: Maatwerk

Beschrijving:

Deze 2-daagse IT Asset Management foundation cursus biedt een introductie in IT Asset Management (ITAM) en is bedoeld voor iedereen die nieuw is met ITAM. Van IT-beheerders met een operationele focus tot de CFO met een budgettaire verantwoordelijkheid. De deelnemers zullen in staat zijn om het concept en het doel van ITAM te begrijpen en hoe ITAM hun organisatie ten goede kan komen. Bovendien zullen de deelnemers inzicht krijgen in de licentiecomplexiteit met betrekking tot IT-operaties in termen van software- en hardware-updates en -aankopen.

IT ASSET MANAGEMENT (ITAM) vormt een belangrijk element in een bedrijfsstrategie die kostenbeheersing, risicoverlaging en verbeterde bedrijfswaarde mogelijk maakt in de IT asset lifecycle, inclusief alle aspecten van hardware en software die in een organisatie worden gebruikt. Een belangrijk aandachtspunt van het trainingsprogramma is het uitbreiden van de workflow en het definiëren van de belangrijkste rollen binnen de ITAM disciplines over de financiële, contractuele en inventaris afdelingen heen, alsmede het benadrukken van de cultuurverandering die daaruit kan voortvloeien voor eindgebruikers in een IT omgeving. De ITAM Foundation Course is gebaseerd op Service Management best practices en de ISO standaarden (ISO 55000 en 19770), en introduceert de deelnemers aan het ITAM werkkader in termen van IT governance en optimalisatie van de IT Assets van aanschaf tot afstoting.

Het trainingsprogramma behandelt de vier belangrijkste ITAM gebieden en hun interactie in relatie tot contract management, compliance, informatie beveiliging, kostenbeheersing en IT business waarde: Hardware Asset Management (HAM) (inclusief Mobile devices) Software Asset Management (SAM) Services en Cloud Asset Management People (SEAM) en Information Asset Management (inclusief Bring Your Own Device).

Deze cursus omvat het examen voor de certificering van ITAM.org

This 2-day IT Asset Management foundation course provides an introduction to IT Asset Management (ITAM) and is aimed at anyone new to ITAM. From IT administrators with an operational focus to the CFO with a budgetary responsibility. The attendees will be able to understand the concept and purpose of ITAM and how ITAM can benefit their organisation. Furthermore, the participants will achieve an understanding of the licensing complexities related to IT operations in terms of software and hardware updates and acquisitions.

IT ASSET MANAGEMENT (ITAM) forms an important element in a business strategy enabling cost control, risk reduction and improved business value in the IT asset lifecycle, including all aspects of hardware and software used in an organisation.

A main focus of the training program is to expand upon the workflow and define the key roles within the ITAM disciplines across financial, contractual, inventory departments as well as highlighting the culture-change that could ensue for end-users in an IT environment. The ITAM Foundation Course is based on Service Management best practices and the ISO standards (ISO 55000 and 19770), introducing the participants to the ITAM work frame in terms of IT governance and optimization of the IT Assets from procurement through to disposal.

The training program will cover the four key ITAM areas and their interaction in relation to contract management, compliance, information security, cost control and IT business value: Hardware Asset Management (including Mobile devices) Software Asset Management Services and Cloud Asset Management People and Information Asset Management (including Bring Your Own Device).

This course includes the exam for the certification from ITAM.org

Maatwerk

Global Knowledge biedt zowel standaard- als maatwerkcursussen die zijn afgestemd op uw wensen en die als besloten cursus op uw eigen locatie of onze locatie gevolgd kunnen worden.

Doelgroep:

A successful ITAM program involves several departments in your organisation such as budget managers, IT service departments and finance. The ITAM Foundation course is designed for all key personnel in these functions. We recommend that the course is attended by several employees from these areas in order to enable a successful and coherent ITAM focus throughout your enterprise, however, individuals can also benefit from this foundation course, and are welcome to attend. Whilst this course has an IT focus, it has been specifically designed for non-IT personnel in mind and so is not full of acronyms or phrases that only IT professionals would know.

Doelstelling:

- **Attending this 2-day ITAM Foundation course, you will achieve an overall understanding of:**
- Why your organisation needs ITAM
- The ITAM business disciplines and best practices
- The challenges and benefits associated with ITAM in a dynamic IT environment
- What to be aware of in daily IT operations in regards to compliance
- How to assess the ITAM objectives of your organisation
- The ITAM ecosystem and key stakeholders
- How the ISO methodology and ITIL approach can contribute to a successful ITAM program
- Risk and cost control of your IT Assets

- The four key ITAM areas and their interrelation (SAM, HAM, SEAM, PINAM)
- The IT asset lifecycle from procurement through to retirement and disposal

- How to achieve compliance within the four key ITAM areas

Vereiste kennis en vaardigheden:

Examens en certificering

ITAM Foundation Certification Exam Overview

The examination is a one-hour closed-book online multiple-choice test, consisting of 40 questions. The pass mark is 65% (26/40)

The exam is invigilated via a remote proctor by Van Haren
