

Basic ABAP Programming

Cursusduur: 4 Dagen Cursuscode: S4D400 Trainingsmethode: Virtual Learning

Beschrijving:

This course is an introduction to ABAP programming on any ABAP platform. The course will equip you with the basic knowledge of the development process, development tools (ABAP development tools for Eclipse), and modern expression-based and object-oriented ABAP coding that you need to write applications in ABAP. You will cover all the techniques that you need to create a simple application using the ABAP RESTful application programming model. The material from this course is essential foundation knowledge that you will need both for further ABAP programming classes and in your own self-study. This course is also available in a self-paced learning format on learning.sap.com.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Doelgroep:

- Developer
- Development Consultant
- Technology Consultant
